The Lark Sprinkler

PROBABLY one of the most discussed pieces of machinery used on a golf course is the putting green sprinkler. One recently brought to our attention is the Lark sprinkler, manufactured by L. R. Nelson Company, of Peoria, Illinois. This sprinkler throws a gentle spray over an area 100 to 150 feet in diameter, and is gearless in design. This company manufactures a full line of sprinkling equipment, including nozzles, couplings and hose menders.
