

## A B C of Turf Culture

(Continued from page 18)

a chemist, or the State Agricultural college. Most state colleges test samples without charge. The samples should be carefully labelled and forwarded in good containers, together with a precise statement of what is wanted.

Very little can be done with water supplies containing lime, so far as removal of the objectionable lime carbonate is concerned. No more water should be used than is absolutely required by the turf. Larger amounts simply increases the quantity of lime carbonate in the soil, and makes the development of acidity more difficult.

**NOTICE TO READERS**—This is the fifth of this series of authoritative articles on turf culture and the chemistry of the soil. It is the most up-to-date and complete information published on this subject. Order your back numbers now before they are all gone. Price 25c each.
