A Letter from the Secretary

BROTHER GREENKEEPERS:—

The recent convention at Detroit is still fresh in our memories. You will probably remember most of the things that were said or done there and there are things that we will forget. The talks, papers, conversations and other interesting subjects have made a lasting impression on our minds. Much good will be derived from them.

The show was a complete success and the new models of equipment which were exhibited were worth looking over.

While all of these are still fond remembrances let us not forget our association and the good it is doing and the good it will continue to do in the future.

Let us not "hide our light under a bushel" as it is often said. Try to find a greenkeeper who is not a mem-

ber of the Association and invite and persuade him to affiliate himself with us. The more members we have the stronger we will be, and better fitted for our work and profession. Explain to him the benefits and good he will derive from our association, the worthy articles which appear in the NATIONAL GREENKEEPER, the knowledge obtained by meeting greenkeepers from every state in the Union and Canada. All these points are just a few of the reasons why we should join.

Let's all get together, put our shoulder to the wheel and give a mighty push, and then watch us go over the top to success, and a more intimate knowledge of our work, thereby binding ourselves together with the bonds of brotherly love and the elevation of the art of greenkeeping.

Fraternally yours,

John Quail, Secretary.
