

GREENKEEPER'S ALMANAC

AUGUST

By JOHN MACGREGOR
Chicago Golf Club

This is a hard month on greens. The temperature is usually favorable for "Brown Patch." Have you remedies on hand? Treat your greens before the disease hits you, "an ounce of prevention is better than a pound of cure."

Grass wants to rest this month. Be careful how you treat it.

"Poa Annuua" is a rank feeder. When it does not receive sufficient nourishment, it has an unhealthy color.

Cut the greens close every day as usual. Do not raise the mowers for the summer, as a heavy green is a real hot-bed for "Brown Patch."

Another light top-dressing will materially help the grass.

Fight the crab grass. On fairways where there is no bent, one spraying with iron sulphate will eradicate it.

New seeding of greens and fairways should be started soon after the 20th to insure a good root system with which to carry through the winter.

The tees demand the usual care.

Fairway watering is usually necessary this month where watering systems are in use. Treat the fairways with Arsenate of Lead for the grubs.

Keep the rough cut and the bunkers trimmed.

Attend the Greenkeepers meetings. If you are not a member you will be before you leave the first one. These meetings are instructive and educational.

Every member get a new member for the N. A. G. A.

Have you paid your dues? "Dinna forget."

HUBBARD NURSERIES
CREEPING BENT STOLONs
Washington and Metropolitan Strains
Pure, free of weeds, and of one season's growth

Golf
—
Sow
Scott's
Seed

for every dot there is a
golf club that sows
SCOTT'S SEED

And this is why they sow it. In the words of a Pennsylvania Greens Chairman: "We seeded our 9 hole course with Scott's Seed and many golf enthusiasts pronounce it the best year-old turf they have ever seen. Our 9 greens were sowed with your German Bent and today there is surprisingly thick green turf. Now you know what I think of Scott's Seed." For the good of your course get more facts about Scott's Seed before you buy.
