

Worthington Mower Co.

Stroudsburg, Pa.

BOOTHS No. 31, 33 AND 35

THE Worthington Mower Company, which continues to specialize exclusively in lawn tractors and mowing machinery will show primarily their latest additions to this important field. Their exhibit will consist of the new Worthington lawn tractor with Model A Ford Motor; the "Multigang" or seven unit two row gang mower; the improved standard 30" cutting unit; the Overgreen having a cutting swath of 50 inches; the 18 inch "Special" hand mower.

The new model Lawn Tractor with Ford A Motor does not supersede their former model with Ford T Engine, but is offered as additional equipment. It is quite similar in general design in that it has the shortened wheel base enabling a small turning radius, absences of all unnecessary parts, thereby a reduction in total weight, but is equipped with the special patented features which gave to its colleague the enviable reputation of being the lightest and most efficient lawn tractor on the market.

The Worthington Lawn Tractor with model T Ford Motor has been improved and is offered as the standard machine for fairway cutting.

The "Multigang" is being introduced primarily for large fairways and aviation fields. Where the cutting time is of importance this machine, having a cutting swath of 16 feet, will mow a given area in 30 per cent less time than the "Quint" or five unit machine.

The fairway unit has been improved in some of its details. Special alloy steels are employed making this mower the finest, lightest and strongest unit to be found anywhere.

The "Overgreen" has been greatly improved and is now offered as the greatest contribution to golf main-

WORTHINGTON "OVERGREEN" POWER MOWER

tenance since Worthington gave to the game of golf the gang mower for their fairways. Its rapid growth since its introduction to the cutting of greens, tees and approaches stamps it as the most remarkable and important machine ever offered.

The 18 inch "Special" hand mower is a most efficient and easy running machine, a high class product for heavy work on greens, tees, lawns, etc.

The following representatives will be at the Golf Show: E. H. Worthington, vice president; R. S. Worthington, vice president; R.

Who Will Win The Hundred Berries?

CHAS. ERICKSON
Minneapolis,
Minn.

JOE VALENTINE
Philadelphia,
Penna.

HERE they are—the men who will construct the putting greens at the 4th Annual Golf Show and Convention of the National Association of Greenkeepers of America at Louisville. On the left is "Charlie" Erickson, who for over thirty years has been greenkeeper at the great Minikahda Golf Club, Minneapolis. He is Captain of the Western team. On the right is Joe Valentine, veteran greenkeeper of the famous Merion Cricket Club of Philadelphia, where many National Championships have been played. Joe knows a putting green when he sees one and he knows too the very latest designs and how to build them.

Fred A. Burkhardt, chairman of the Show Committee has set aside two spaces in the center of the Show floor, each one twenty by thirty-two feet and will furnish the contestants with molding sand and white sand and whatever equipment is necessary to form up these greens to a scale in whatever way they want. The contestants will be given absolute freedom to choose any type of green they desire, but they must provide a drawing to scale three foot square showing the drainage lines because these cannot be indicated on the green itself.

John Morley will appoint a committee of disinterested people to act as judges and they will decide which green is the better for every purpose whereupon the Captain whose team wins the contest will receive a hundred dollars cash from the Show Committee.

Mr. Erickson had planned a trip to California but when he was notified that he was Captain of the Western team and realized how much fun they were going to have in Louisville, he cancelled his California trip and says he will be on the job with his sleeves rolled up. Neither Captain has announced the make-up of his team but they must be greenkeepers as the Committee announces that architects and pros are barred.
