## Buckner Announces Irrigation Improvements

The unprecedented interest in golf course irrigation during the past fifteen years, which has been pioneered by the Buckner Mfg. Co., originators of golf course irrigation, slow-motion sprinklers, quick coupling valves and the hoseless methods of golf course irrigation, has reached such a stage that practically all the best clubs in the country are now investigating their modern methods of irrigation.

The extreme dry weather in the Eastern and middle states during 1930 has convinced the clubs that they cannot have worthwhile putting greens or fairways without economical means for distributing water, and that they cannot depend on Nature to provide such means.

The Buckner Mfg. Co. has just announced a phenomenal improvement in golf course irrigation for the coming season. They will have an exhibit of this new equipment at the Columbus greenkeepers' show, and it behooves all chairmen of Green committees and greenkeepers to attend the convention to investigate this new equipment. Should they not be able to attend the convention, they should secure the new "Golf King" catalog from the Buckner distributor in their territory, or write to the factory direct.

These people have developed the hoseless systems to the extent that one man can take care of the irrigation of an en-

### NATURE'S OWN FERTILIZER

**NITROGEN....yet  
it does not burn...**

is the way one outstanding Connecticut greens authority acclaimed DRICONURE—the new all organic fertilizer. "Top dressing with Driconure gave wonderful results... gave us the best greens we ever had."

You too, can use DRICONURE with safety and satisfaction. It is economical and will prove to be just the fertilizer you have been looking for. NOW is the time to consider this item. Write

New York, N. Y.

tire 18-hole golf course, no matter where located. The saving in labor, hose and portable sprinklers will pay a very large dividend on the money invested in a hoseless system. In fact, this saving will entirely pay the difference between a hose and a hoseless system in two or three years, after which time all of this saving is "velvet" for the clubs.
