

## Winning the Approval of the Greenkeeper

Greenkeepers who are using the PENNSYLVANIA Super Fairway Mower have suggested these twelve Super Fairway facts which appeal both to the individual player and to the Greens Committee.

There are other Super Fairway facts, too. They are revealed in the attractive new Pennsylvania golf catalogue, which also illustrates and describes the Super Roller Greens Mower—the precision mower for putting greens—as well as the other PENNSYLVANIA golf mowers. Write today for your copy.

### PENNSYLVANIA LAWN MOWER WORKS

1645 North 23rd Street

Philadelphia

### Super Fairway Facts For the Busy Greenkeeper

1. Developed as the result of a thorough study *on the links* by Pennsylvania engineers.
2. Embodies a half century of experience in the manufacture of quality lawn mowers. (The first Pennsylvania mower was made in 1877.)
3. Reduces mowing time and labor. The Quint will mow all the fairways on an average 18-hole course in less than two days.
4. Operates with minimum power.
5. Sturdy enough to withstand the strain of high speed operation and "hold the ground" without jumping or shaking.
6. Pennsylvania Quality construction insures continuous service and low maintenance costs.
7. May be used to cut the rough by a mere raising of its units.
8. Swivel attachments to the frame permit each unit to follow independently and exactly the contour of the ground.
9. The Quint, cutting a swath of 144 inches, may be changed to a Trio (86-inch cut) by the removal of only two bolts.
10. Unique, positive lifting device, easily operated by one man, permits the raising of the two outboard units on the Quint so that it may enter narrow spaces and cross bridges.
11. The tractor *pulls* the Super Fairway and, therefore, is easy to steer and to detach for other service.
12. Every moving part is *roller bearing*, even the ground rollers.
