#### Greenkeepers' Golf Show

(Concluded from page 38)

NOTICE All greenkeepers who cannot attend the Golf Show are requested to drop a postcard to the exhibitors at their factory address and new catalogs describing their products will be mailed free of charge.

Mr. A. H. Roper, and if possible, the following representatives of this company will also be in attendance: Mr. John B. Pol from the factory and Mr. Louis Bailly-Blanchard from the New York office.

J. OLIVER JOHNSON, INC. Chicago, Illinois

BOOTH NO. 11—BALL ROOM OLIVER Johnson, Inc., will I not attempt to exhibit their entire line of golf equipment but will have an attractive booth and will distribute to greenkeepers. chairmen, golf club officials and others interested a copy of their new catalogue, entitled, "Seeds of Success." This new 1929 catalogue illustrates and describes about everything needed in the equipment of a golf course and will be of great interest to those who have maintenance problems to solve.

The exhibit will be in charge of Mr. H. S. Bailey, manager of the golf department, who is very well known and very well liked in the

golf field.

TORO ASSOCIATES

BOOTH NO. 4—BALL ROOM  $\Gamma$ ORO Associates, as the name applies, will exhibit Toro mowing machinery and a large line of accessories and golf course equipment which they handle in various parts of the country. Following is the personnel of Toro dealers who will be at the Golf Show.

From Cleveland there will be: Mr. A. E. Flack, Mr. H. J. Streich,

and Mr. John Alves.

From the Friend Mfg. Company:

Mr. W. C. Tyson. From Indianapolis: Mr. B. K. Cohee.

From Detroit: Mr. F. J. Feldman and Mr. W. E. Blankinship.

From Rochester: Mr. O. W. Bentley and Mr. E. T. Leake.

From Philadelphia: Mr. L. T.

From New York Toro Co.: Mr. W. E. Lafkin.

From New England Toro Co.:

Mr. O. O. Clapper.

Messrs. Flack & Streich will introduce at the show, a Dunham Turf-AIR-ator, their Cleveline Sprinkler barrel. Steel Flag Pole, Putter Hole Cup and Hole Cutter. In addition to their line, a Golf Wheelbarrow.

Mr. Gustin will display the full Economy sprinkler line, a champion Sod Cutter, Fletcher Steel Products and an Invisible Hose Reel.

Mr. Tyson will exhibit a Friend

Model K Golf Spray.

#### GREENKEEPING YESTERDAY AND TODAY

(Concluded from page 12)

I have endeavored to lay before you our methods of the past and present regarding greenkeeping. What the future has in store for us, I do not know.

But I am inclined to believe, with so many new courses being constructed with the intention of further progress, the greenkeeper, who is aiming to give the services that will be demanded, will be compelled to be well versed in botany, and plant pathology. While we all realize that the best education he may get is from practical knowledge, yet I am of the opinion that knowledge along theoretical lines helps.

In the many callings of life, there are many vocations where one can, by perseverance, industry and skill, reach the top of the ladder of fame, but greenkeeping is one a few where it is impossible to reach it, for nature, Mother Earth, will not let him. She will only allow him to go so far and no further.

protection of future generations, and when we endeavor to try and get bargained for.

ahead of Nature, she penalizes us by producing insects, bugs and various fungus diseases in order to check us.

Greenkeeping really belongs to the Arts and Sciences; for Art creates what Science discovers.

FAIRWAY WATERING (Concluded

from page 15) 400 g. p. m. and has not been lowered an inch so the capacity is ample.

The vertical lift centrifugal pump is noiseless, a valuable feature in installations near club houses, and has practically no vibration. The pump is direct connected to a pressure storage tank and with flap valves. automatic pressure regulators and various safety devices, it makes a fairly fool-proof installation.

Radwaner Guarantees Seed

All the grass seeds which sell for golf courses are sold by the I. L. Radwaner Seed Co., seed merchants, 115 Broad St., New York, under the guarantee that after the merchandise is received by the ultimate user, he is to sample each lot of seed they send and mail a 4 oz. package to the U.S. Dept. of Agriculture at Washington, D. C., for testing purposes. Within a few days the department will notify the sender of the sample what the exact purity and true va-riety of the article is. If the goods they ship out are not in everyway as represented, they are at once to be returned at their expense before they are being used.

Through this method this company wants to assure the public that they will buy their Bent Grasses, their Fescues, and their ingredients with a positive guarantee by a test of the official Government igency, which is made free of charge, that the seed which will be planted on the golf course is absolutely as required by the party ordering same.

Of course the Radwaner Co. would be willing to furnish private laboratory tests with each lot of seed they ship, but advise their buyers to mail their samples to Government or State Agricultural stations She is looking forward to the in order to be quite sure that what they intended planting is the article

Plan now to fertilize fairways this year with

### MILORGANITE

used on more than 1000 golf courses during 1928

Exceptional Mechanical Condition facilitates uniform distribution and makes it an excellent carrier for lead arsenate, sulphate of ammonia, etc.

Milorganite supplies valuable Organic Nitrogen, the vital plant food element for turf grasses. Its nitrogen is not water soluble but is gradually converted into available form by soil processes. Milorganite thus provides for long continuous feeding, particularly on fairways.

# RESERVES HAVE BEEN ACCUMULATED TO INSURE PROMPT SPRING SHIPMENT.

Milwaukee, Wis.

# For the Control of Brown-patch

TURFCALOMEL is the outcome of experiments to determine the most satisfactory, efficient, convenient, and safest fungicide for both large and small brownpatch. It contains both corrosive sublimate and very finely powdered calomel carefully adjusted in composition with mineral matter. This composition has distinct advantages. It prevents caking, gives bulk, and allows of a more even distribution of the active ingredients—thus reducing to the minimum any possibility of burning the turf. The same results cannot be obtained with the chemicals either alone or mixed with sand or compost.
