

# Insure finest turfs with NAGA!

*"Not a Grub Allowed"*

## *Inexpensive, positive, easy to use*

Take no chances with grubs and worms this year. The ravages they make cost your club heavily in money and your pleasure of the game.

Prominent clubs all over the country use Naga for positive control of grubs and worms on tees, greens and fairways. They know that Naga contains superior protective qualities.

Naga contains 2% more Arsenate of Lead to the pound than ordinary Arsenate of Lead.

Naga covers more turf per pound because it is fluffy and ground extremely fine; 99.5% passes through a silk screen of 350 mesh to the square inch.

Grubs and worms are sure to get an *effective quantity* of this *fine* material. Their mouth parts are very small and cannot swallow a coarse material.

In addition to its protective qualities, Naga is detrimental to the growth of many weeds. It stimulates Bents, Bermuda grass and other fine turfs. May be used with Sulfate of Ammonia and other approved fertilizers.

Write for more information on Sherwin-Williams Naga. Greenkeepers of leading golf clubs acclaim it as the safest, surest protection against these pests.

*Send for valuable free pamphlet giving full instructions for grub and earthworm proofing*
