

Jacobsen Power Putting Green Mower

Cheaper Golf, But Better Greens

The list of Jacobsen Power Putting Green Mower users reads like a "Blue Book" of Golfdom. Overwhelming evidence of superior performance and user satisfaction gives the Jacobsen unshakable prestige as the foremost tool in modern golf upkeep equipment. One trip across the green with this remarkable mower removes all doubt as to its cutting efficiency, economy of labor, and respect for the "Sportiest" Green.

On the ultra-modern green, the 19-inch model is preferred. On the large green, where undulations are not too pronounced, the 24-inch model is practical. As America's foremost specialists in power mower design and construction, the Jacobsen Manufacturing Company presents this mower as a perfected tool equal to the demands of the most exacting greenkeeper. Major castings of airplane aluminum, a broad traction roller, auto-type differential, separate clutch control of traction and cutting units, self sharpening reel, and a modern motor of proved dependability, enable this mower to answer every requirement.

Gentlemen:

In reply to your letter of June 25th. In my experience as a greenkeeper I have not been able to have a putting green mower do the work of greens to come anywhere near equal to the Jacobsen Power Greens Mower. Last year we had five men with handmowers. This year two men do the same work taking about four and one-half hours each.

I have one of your brush attachments. It is the best thing that I have seen for brushing greens and particularly bent-greens.

I top dressed two greens a few days ago using the Jacobsen, and brush attachments for brushing in compost and rolling at the same time. This saved at least three hours time on the two greens. If I can be of any help to you let me know.

Truly yours,

Wm. M. Goodwin, Greenkeeper
