

USE NAGA to control grubs and worms---to deter weed growth, too!

Prominent greenkeepers all over the country insist upon Naga—the *tested* Sherwin-Williams turf protector because it is *threefold* in its benefit to greens, tees and fairways!

Not only does Naga control the expensive ravages of grubs and earthworms, but it actively deters the growth of weeds and at the same time stimulates the growth of Bents, Bermuda grasses and certain other fine turfs.

Read these reasons why:

Naga contains 2% more Arsenate of Lead to the pound than ordinary Arsenate of Lead.

Naga covers more turf per pound because it

is fluffy and ground extremely fine; 99.5% passes through a silk screen of 350 mesh to the square inch.

Grubs and worms are sure to get an *effective quantity* of this *fine* material. Their mouth parts are very small and cannot swallow a coarse material.

Naga mixes perfectly with Sulfate of Ammonia and other approved fertilizers but is not recommended for Poa Annua.

Write for more information on Sherwin-Williams Naga. Greenkeepers of leading golf clubs acclaim it as the safest, surest protection against these pests.
