

Greenkeeper —

Lyman Carrier Products are Guaranteed to Produce Healthy, Beautiful Turf or your money refunded

LECCO

THE COMPLETE GRASS FOOD
---eliminates top dressing with
infested composted soil

LECCO is a scientifically prepared grass diet containing organic and inorganic grass foods. These foods are mixed in the proper proportions and in a form so "delicious" to the grass organism that they are eagerly "eaten" and assimilated. This explains why LECCO produces so quickly a healthy, beautiful turf—a turf that resists disease, fights weeds, and withstands hard usage. The use of LECCO also eliminates top dressing with composted soil, which is the proven source of most turf troubles. LECCO is not a guess or a gamble. It is a scientific formula discovered by Lyman Carrier, former U. S. Govt. Agronomist, after years of research and many golf course experiments. The remarkable improvement that LECCO has made to the turf on hundreds of golf courses enables us to offer it under a positive money back guarantee. You owe it to your club to give LECCO a trial—NOW.

**AMOUNT
REQUIRED**
30 lbs. twice a
month for aver-
age green.
300 or 400 lbs.
per acre for fair-
ways.

COCOOS

CREeping BENT SEED
---develops beautiful greens like
famous California clubs---

**AMOUNT
REQUIRED**
Because Cocoos
Seed tests be-
tween 95 and
99% pure, use
only 15 lbs. to
the average
green.

COCOOS is a seaside variety of creeping bent discovered by Lyman Carrier in the Coquille Valley, Oregon. It is one of the rare forms of *Agrostis Maritima* and possesses all the necessary requisites of a perfect putting surface. COCOOS is silk-like in texture, stands erect, resists disease, and withstands adverse weather or hard usage. It was first used to develop the beautiful greens on famous California clubs. Now it is widely used on inland courses where it retains its gorgeous green color and hardy qualities. The limited supply of COCOOS SEED prompts us to advise ordering immediately to insure Spring delivery.
