

This Power Means *Sound Economy*

The Fairway Tractor handles rollers with ease over flat or rolling ground.

Plowing new fairways at the Monagh Lea course near Portland, Ore.

Horses cut up the turf—so this sod-wagon was hitched to the Fairway.

Invaluable for construction work. This Fairway is disking to prepare a good seedbed.

The square-turn feature of the Fairway enables it to cut close to trees and shrubs.

Look over the pictures on this page and you will see why it is sound economy to include the purchase of a McCormick-Deering FAIRWAY Tractor in your 1931 budget. It is versatile, flexible, mobile power that has a proved reputation for reducing maintenance expense on the golf course.

It speeds up work during the playing season; it mows the fairways and cuts the rough in short order; it is invaluable for construction work; it completely fills every need for power, and it is economical to operate. The nearest of 115 Company-owned branches and 42 distributors in the United States and Canada will give you information and a demonstration. Write us for catalog.

INTERNATIONAL HARVESTER COMPANY

606 So. Michigan Ave. Of AMERICA Chicago, Illinois
(Incorporated)

Cutting the rough is no job at all for the Fairway and this built-in power mower.

Fertilizer is spread quickly and easily with the Fairway and the McCormick-Deering Spreader.

A compact unit that combines with the Fairway to reduce maintenance expense.
