

The New Worthington "Overgreen Scout" and "Multigang" Gang Mower

THE Worthington "Overgreen Scout" may be briefly described as being a "perfect machine" for putting green service. It has proved itself to be this, by practical tests on a great many of the most prominent golf courses. It will cut an average green of 6000 square feet in ten minutes and leave as smooth and uniform a cut as any mower in existence—either hand or power. The front roller which regulates the height of cut, is adjusted by means of a new device of the simplest construction which fixes the height through the use of the fingers alone, without recourse to any tools. The wonderful performance of this machine, which warrants its being exploited so unreservedly, is due to improvements which are absolutely new in this field which have secured entirely new results, never before approached by any other putting green apparatus.

The Worthington Lawn Tractor and Convertible "Multi-gang" Gang Mower

This wonderfully efficient machine is of the well-known patented Worthington Convertible type, capable in this new design of being transformed at the will of the operator from its seven-unit formation and swath of 16 feet, into a Worthington five-unit quintuplex or a Worthington three-unit Triple of respectively twelve and seven feet width of swath. Any of these changes may be accomplished by the unassisted operator in a minute's time. The saving in expense of the cutting operations, by the adoption of the "Multi-gang" which will cut an acre in four minutes, is one of the features connected with the development of this incomparable machine.

The catalog which we will immediately send to you upon request, will describe these remarkable machines, which have by recent patented discoveries, brought about a revolution in golf maintenance. Their use is fast becoming universal.
