

THE NEW "OVERGREEN SCOUT"

A new and perfected roller unit in gang formation.

A product that carries every improvement that long tests and many leading greenkeepers could suggest.

Leaves no mark on even the most delicate turf and is of such amazing efficiency as to be out of the reach of competition.

Has a total cutting swath of nearly four feet.

Will cut an average green of 6000 square feet in ten minutes. As a time and money saver nothing approaches this performance.

Eight blade high speed reel.

Newly designed grass boxes catch all of the cut grass, wet or dry.

Alemite lubrication.

Highest grade of material used throughout.

For going from green to green the units rest upon rubber tire carriers.

The "Overgreen" can also be supplied with cutting units of the high wheel type.

Although cutting the greens is known to be the most expensive operation in golf course maintenance the adoption of the Worthington "Overgreen" reduces this cost to an almost negligible quantity.

No club or greenkeeper in these days can afford, from an economic standpoint, to disregard the claims of this great time and labor saver.

The Worthington gang mower was first on the fairways and is first on the greens!
