

"Far Superior for Golf Courses"

The McCormick-Deering Fairway Tractor with 7-ft. built-in power mower, cutting the rough on the Edgebrook Golf Course, Rockford, Ill. Mr. Rudelius is on the Fairway

"THE SQUARE-TURN FEATURE of the McCormick-Deering FAIRWAY makes it far superior to any other type of tractor for golf course work." This is the opinion of Mr. George Rudelius, greenkeeper of the Edgebrook Golf Course, Rockford, Ill., who has had nine years' experience with other types of tractors. The FAIRWAY operates a five-gang mower on the fairways and the special built-in 7-foot power mower on the rough. The ability of the latter to cut close to trees and shrubs appeals strongly to Mr. Rudelius.

He also refers to the gratifyingly low fuel and oil consumption of the FAIRWAY. The Edgebrook Course is operated by Edgebrook Subdivision. The FAIRWAY has many jobs around the development. It operates a saw; moves dirt and stones; plows, disks, and drags three acres of gardens; and it will handle a snow plow this winter. Ask for information about the McCormick-Deering FAIRWAY at nearest of 115 Company-owned branches and 42 distributors in United States and Canada. Write us for catalog.
