## Women Enjoy Convention

**W**IVES of the National Greenkeepers thoroughly enjoyed the New York Convention where they were entertained royally by the Officers of the Greenkeeper's Association and the Exhibitors. There were bus rides, theatre parties and luncheons and this hospitality was much appreciated by the ladies.

Twenty new members were taken in, proving that the Auxiliary association is growing. The dues were reduced to one dollar and the initiation fee is three dollars.

At the Annual meeting the following officers were elected: President, Mrs. Jos. Varn Hagen, Detroit; Secretary, Mrs. Willie Smith, Detroit and Treasurer Mrs. John Quaill, Pittsburgh.

## Layman Praises Convention

Mr. Robert E. Power,  
Editor, NATIONAL GREENKEEPER,  
Dear Sir:

It may interest the members of the N. A. G. A. to hear from a layman. Being a professional man and always looking after the welfare of humans, I was keenly interested in the trials and tribulations the greenkeepers have raising grass. It wasn't so long ago that I thought as many others do, that turf development was just about the easiest of horticultural endeavors. But your exhibits and conferences at the Hotel Pennsylvania opened my eyes to the many difficulties you encounter. If more golfers would only visit your conventions they would then appreciate the courses and the efforts of the greenkeepers.

Let me compliment you and your wonderful committees on the splendid show and especially the Thursday night banquet and Friday stag which I was fortunate enough to attend. The food was excellent, the music and entertainment just right and the speakers of the evening sounded the right note when they urged closer co-operation between our Green committee chairmen and greenkeepers. My hat off to Robert J. Hayes, I know he was responsible for a wonderful program; Ganson Depew should use him as a running mate in his presidential campaign if he really wants to get results.

More publicity to these conventions and educational conferences and the golfers will eventually appreciate the fact that the greenkeepers are really the ones responsible for better golf courses.

Very truly yours,

PHILIP BACK, D. D. S.

237 Willis Ave., New York City.  
January 25, 1932.

## Depew Offers Cooperation

Mr. Robert E. Power,  
Editor, NATIONAL GREENKEEPER, INC.,  
405 Caxton Building,  
Cleveland, Ohio.

Dear Mr. Power:

I have returned to Buffalo with the most delightful recollections of my attendance at the Convention of National Greenkeepers' Association of America, and the banquet last night in New York City. In my attendance at the sessions I was particularly impressed with the splendid papers which were read and which were of the utmost value to all greenkeepers. The attendance of over 500 men at the meetings testifies to the great interest which is now being taken in greenkeeping and thoroughly justifies the existence of the National Greenkeepers' Association. It was a great pleasure for me to renew my friendship with many greenkeepers whom I have known for years, and to make the acquaintance of others.

I was deeply touched at the banquet in being informed that I had been elected an Honorary Member of the National Greenkeepers' Association as an evidence of their esteem and affection for me and for whatever I have been able to do as Chairman of the Green Section, U. S. G. A. in bringing the greenkeepers and our Association in closer touch and co-operation with each other. In my thirty years of golf I have received many honors but none I will esteem higher than the Honorary Membership which was conferred upon me last evening.

I think we can regard the Green Section of the U. S. G. A., and the greenkeepers of America as one great big happy family, and certainly we are this with five greenkeepers on the Advisory Committee of the Green Section.

With my very best wishes for the future success of the National Greenkeepers' Association which with the help of your splendid magazine, the NATIONAL GREENKEEPER, is doing so much for the development of better turf conditions on the golf courses of this country, I am,

Cordially yours,

GANSON DEPEW,

Chairman, U. S. G. A. Green Section.

Marine Trust Bldg.,  
Buffalo, New York.  
January 22, 1932.

## Educational Film Attracts Attention

An exceptionally interesting exhibit at the recent Annual Greenkeepers' Convention and Golf Show was the showing of the film "Golf Hazards," which attracted considerable attention and caused many favorite comments.

Crowds of greenkeepers stopped to see this film which tells a human interest story of a golf match between the greenkeeper and his Green chairman. In addition to this feature there is also an amazing scene of *Rhizoctonia* fungus actually growing and produc-

ing its mycelium, the cobweb-like growth seen in the early morning on brown patch spots.

Various types of brown patch and how to control them are also shown, as well as interesting views of clubhouses and their courses.

This film is one reel in length and is available either in the standard 35 mm or home movie 16 mm sizes. You can book the picture "Golf Hazards" for showings at your meetings, absolutely free of charge, by writing direct to the Bayer-Semesan Co., 105 Hudson Street, New York, N. Y., manufacturers of Nu-Green and Semesan.

Thirteen tons—a lot of seed, but it produced one of the most beautiful golf course carpets imaginable at the Lawsonia (Wisconsin) Country Club. No. 10 green and No. 11 tee are depicted above. Scott's Seed is carefully selected and thoroughly cleaned to insure freedom from weed seeds and waste matter. It is recleaned in our own plant over the most modern machinery and

Our book, "The Putting Green", is free for the asking. It contains latest information on the control of turf diseases. May we send you a copy today?

sold direct to golf clubs, which explains our very reasonable prices. One out of every five golf clubs in the country finds that it pays to sow Scott's Seeds (we have designs on the other four). They discover that our seed goes farther in sowing, saves costly weeding and produces thick, healthy turf that holds its own against adverse conditions affecting many courses.

## Ant-Tee-Ant Kills Them

Ant-Tee-Ant was used extensively last summer all over the United States and Canada to destroy ants, worms, bugs and beetles on greens and fine lawns with great success. It brings up the insects and kills every one it touches and does not injure the turf. A great many letters were written by greenkeepers to tell the manufacturers of Ant-Tee-Ant what remarkable results they obtained.

One quart of Ant-Tee-Ant is mixed with 50 to 100 gallons of water and poured into the ant nest or where the nests are numerous and close together they are flooded. More information can be obtained about a special discount for winter purchases by writing to the makers, The Royal Products Co., 216 S. Charles St., Baltimore, Md.

## Moore Visits Canada

Mr. Chas. R. Moore, of the J. M. McCullough's Sons Co., Cincinnati, Ohio, met representatives of the Prince Edward Island and New Brunswick Grass Seed Growers' Associations at Sackville on November 30 to discuss the market situation in regard to bent grass seed. This firm has been the sole distributor in the United States of Prince Edward Island bent, velvet bent, and Canadian seaside bent from New Brunswick, and Mr. Moore has renewed contracts covering another term of years. Although the general depression has affected prices for bent seed, the growers have been well pleased with their business relations with the J. M. McCullough's Sons Co., and are hopeful for the future of the industry.

**NOW,**  
a 9-gang, unbreakable  
**PENNSYLVANIA**  
**Fairway Mower!**

*cutting a swath of 21½ feet*

This is the largest grass cutter made. Yet for all its great size, each unit has complete flexibility and the outfit rides smoothly over undulations. Frame and units, of malleable iron and steel construction, are *positively unbreakable*.

It is easily convertible and can quickly be changed to a 7-gang, a 5-gang, or a 5 and 3-gang.

*A revolutionary improvement—  
36-inch cut unit*

For 1932, PENNSYLVANIA Quint and Trio machines can be supplied with either 36" cut or 30" cut units. You will at once appreciate this important innovation.

The new Giant Quint cuts a swath of 14½ feet, or only two feet less than a 30" 7-gang. The initial cost is about \$200 less than the 7-gang, the upkeep considerably less and it is much easier to handle.

The new Giant Trio cuts a swath 8½ feet, or 1½ feet wider than the 30" Trio and costs only \$35 more, complete.
