

Would You Go Back to the Old Single Horse Mower For Your Fairways?

1914 MODEL WORTHINGTON TRIPLE GANG MOWER

This, the first gang mower was hailed as marking a revolutionary advance in lawn or fairway mowing. If the weather were not too warm for the horse it would cut an acre in half an hour or 18 holes in a week.

1932 MODEL WORTHINGTON "MULTIGANG"

This Multigang, the greatest achievement in modern lawn mowing machinery, cuts an acre in four minutes, when drawn by a Worthington lawn Tractor, or 18 holes in five hours.

The History of the Worthington Gang Mower is the Complete History of Lawn Mower Progress.
