

THE WORTHINGTON "SCOUT OVERGREEN"

THE WORTHINGTON "CONVERTIBLE MULTIGANG"

Constitute the greatest improvements ever made in putting green and fairway mowing.

Reduces any club's cost of the entire cutting operations more than one-half.

The "Overgreen" cuts 18 greens of average size in four hours with one man.

A newly invented attached "flip" carrier is used for transporting the units between the greens which dispenses with the inconvenient detached two-wheel truck or carrier heretofore in common use.

Its units are also fitted with means for simultaneously adjusting the height of cut on all three units alike in thirty seconds' time. No measurements or straight edges required.

The patented Multigang cuts an acre in four minutes, or 18 fairways in from five to five and one-half hours. These achievements, heretofore unapproached, are capable of demonstration at any time.

WORTHINGTON MOWER COMPANY

The Largest Manufacturers of Gang Mowers in the World

Main Office and Factory—Stroudsburg, Pennsylvania

Agencies in All Principal Cities.
