

Doc's Dugout

continued from page 10

mowing unit was imported from Ransomes, Sims & Jeffries, Ltd., Ipswich, England, where the fairway unit was born many years earlier. Worthington decided that a horse could pull a greater load so he imported two more mowing units and designed the first three-gang mower. The gang mower frames were constructed of 4" x 4" oak beams and all the necessary unit posts were hand-made by a local blacksmith.

For several years, visitors to Worthington's estate saw the advantages of the three-gang mower and many of his friends asked him to build a set for them. Based on the demand for his mowers by friends, he realized that there was a market for his three-gang mowers. Holding the patent rights for the gang mower, he formed the Shawnee Mower Company in 1912 and started production in 1913. A few years later, he designed the five-gang quintuplex drawn by two horses. In 1919, Mr. Worthington designed and built a tractor to pull the gang units and that was the end of "horse-power" as turfgrass

maintenance equipment. In 1929, Worthington built the Worthington Mower Company plant in Stroudsburg, PA. The Shawnee Mower Company was dissolved and moved to the Stroudsburg plant in the early 1930's. By 1945, the Worthington Mower Company was producing tractor-drawn gang mowers which could be purchased in groups of 3, 5, 7 or 9 units. They also specialized in golf course and sports turf tractors to pull the gang mowers. The Jacobsen Manufacturing Company acquired the Worthington Mower Company in 1945, and production of these units continued in Stroudsburg until 1961, when the entire operation was moved to the Jacobsen facilities in Racine, Wisconsin. The familiar orange color of Jacobsen and Worthington mowing equipment can be seen today in the Textron (Jacobsen) line of equipment. Gang mowers have shown continued improvement over the years with some of the units a combined tractor and mower in one unit. That's Progress!

STM

Members on the Move

Matt Mattes, former student member, has taken the job of Head Groundskeeper with the Columbus (GA) Redstixx. Matt's new phone number is 706/324-5260.

Jeff Limburg, former student member and 1998 STMA Scholarship recipient, is now Head Groundskeeper with the Columbus (OH) Clippers. Jeff can be reached at 614/462-5250.

Raechal Sager, former student member and 1997 STMA Scholarship recipient, is the new Head Groundskeeper for the West Michigan Whitecaps. You can contact Raechal at 616/784-4131.

Talk About Student Ambition!
Congratulations to all three of you!
