

Floyd Perry Workshop

A new optional event joins the Conference line up for 2001. It's a FLOYD PERRY WORKSHOP - to be held on Wednesday, January 17.

Floyd Perry, for those of you who may not know him, is the Director of Grounds Maintenance Services in Orlando, Florida. He has conducted these educational seminars and workshops in all 50 states. He's spoken at numerous state, regional and national Conferences and is a frequent contributor to sportsTURF magazine and other industry publications.

Floyd is author of three books: The Pictorial Guides to Quality Grounds Keeping: I Covering all the Bases; II There Ain't No Rules, and III Maintain it Easy, Keep it Safe.. Floyd also has produced three videos: The ABC's of Field Maintenance, Vol. I Softball; Vol. II Baseball; and Vol. III Soccer/Football Field Refurbishment.

Floyd was the head groundskeeper for the 1996 Olympic venue, in Columbus, Georgia. Prior to estab-

lishing Grounds Maintenance Services, he served as the Director of Baseball for the Boardwalk & Baseball Theme Park in Baseball City, Florida.

Floyd's workshop is a combination of in the classroom educational sessions and on the field hands-on sessions focusing on efficient methods to handle daily tasks and time-trimming techniques to accomplish quality field maintenance.

The workshop will begin with classroom sessions including: Why I Need to be More Professional in the 21st Century; and Break the Budget: 101 Creative Ideas for the Progressive Groundskeeper. Participants will then spend part of the day out on the field, with hands-on demonstrations that both show and tell key points of field maintenance.

Add this super session to your Conference line-up and get ready to learn from a Master!

Why the Switch?

Why are football and soccer facilities all over the country switching to Soilmaster® soil conditioner?

For great-looking, safe-playing fields...

Soilmaster® soil conditioner is ideal for incorporating into aerification holes to relieve compaction in the high traffic areas between the hash marks and the 20-yard lines. Made from a unique montmorillonite clay, and fired for maximum hardness and stability, each granule has a network of thirsty pores that quickly wicks water away from the playing surface and promotes drainage. The result - deep rooted, divot resistant turf that recovers more quickly from heavy play.

It's time you made the switch!
