

The Aquacide™ Environmental Weed Control System

THE AQUACIDE is a recently developed new technology using super heated water to non-selectively eradicate unwelcome vegetation such as weeds. This product uses a process in which water is super heated on demand under very low pressure and then pumped through a heat resistant hose to an application delivery system. The extreme heat of the water immediately breaks down the molecular structure in the vegetation killing the plant on contact. This provides a safe alternative to using chemical herbicides especially in areas such as parks, playgrounds and sports fields. The Aquacide can be used in many applications including the line marking of playing fields, around public areas, between asphalt and curbs, and growth around fencing and poles, to name only a few. With the growing need for non-chemical vegetation control, the Aquacide is proving to be the leader. For additional information, please contact:

You do what you can for as long as you can, and when you finally can't, you do the next best thing. You back up but you don't give up.
— Chuck Yeager

Goal Mouth Problems? SPORTGRASS™ it!!

The SPORTGRASS system consists of a 100% natural grass playing surface grown into a layer of amended sand. Within the layer of sand are polypropylene grass blades tufted into a woven backing. Because the roots of the grass plant grow down through the synthetic blades and woven backing, the crown and the root of the plant remain protected.

Even during heavy use, SPORTGRASS maintains a consistent and level surface. The synthetic blades and woven backing form a matrix with the root system of the natural grass. So if the natural grass blades are temporarily worn away, the stability and safety of the area is retained.

Test results indicate that SPORTGRASS surfaces can stand and recover up to five times faster than conventional grass.

SPORTGRASS can be used for repairing goal mouth and high traffic areas to full field installations. SPORTGRASS is available in a big roll grown form or as a grow in product.

SPORTGRASS is available from your Sports Turf Specialist DOL TURF RESTORATION LTD. Book soon as the SPORTGRASS is going fast. Call 1-800-794-9664 for details. ♦

Did You Know?

The overwhelming majority of athletes prefer a natural grass surface as it is more forgiving and causes less injuries than synthetic turf.

— Dan Almond, March '99 STM
