

*Happy Holiday Season from The Staff at Turf Care!*

### **The New Groundmaster®7200**

Introducing the first zero radius turn mower that doesn't hibernate when the snow flies. The patent-pending POLAR TRAC™ system converts the mower to a snow removal machine with rubber tracks and a heated cab – That's Groundmaster Versatility. A quick connection system allows you to switch between snow blower, rotary broom, angled snow blade and V-plow.

For more information, contact your Turf Care Sales Representative.
