

A New List of Deer Resistant Plants For the Garden

Editor's Note: As the drought has affected landscape plants outside of irrigated gardens, it appears that deer have changed their behavior by aggregating more around gardens and munching on previously avoided plants. The damage is indeed staggering in some situations: "They eat everything." Our office is often asked for a list of deer resistant plants. Regularly we devote an article to inform you about innovations to prevent deer browsing. Last year Mary Lynn Cox, in her article "Co-existing with Deer" in *Pacific Horticulture* released a list of plants that deer seem to avoid and plants which are "safe bets"—deer may taste but usually do not destroy them.

Plants Deer Seem to Avoid

Acanthus mollis
Acer circinatum
A. palmatum
Aconitum
Agave
Ageratum houstonianum
Allium (some)
Aloe
Amaryllis belladonna
Artemisia
Arum
Arundo donax
Asarum caudatum
Asparagus falcatus
Baccharis pilularis
Bamboos
Beaucarnea recurvata
Begonia tuberhybrida
Berberis
Brodiaea
Buxus
Actaceae
Calycanthus occidentalis

<i>Carex</i>	<i>Hakea suaveolens</i>
<i>Catharanthus roseus</i>	<i>Halimium atriplicifolium</i>
<i>Ceanothus glorusus</i>	<i>Helichrysum</i>
<i>Cerastium tomentosum</i>	<i>Herbs, except basil</i>
<i>Chrysanthemum frutescens</i>	<i>Hibbertia scandens</i>
<i>C. maximum</i>	<i>Hippophae rhamnoides</i>
<i>Clivia miniata</i>	<i>Hosta</i>
<i>Corokia cotoneaster</i>	<i>Hypericum</i>
<i>Cortaderia selloana</i>	<i>Illex, except thornless</i>
<i>Corylus cornuta californica</i>	<i>Impatiens walleriana</i>
<i>Cotoneaster buxifolius</i>	<i>Iochroma cyaneum</i>

HELP WANTED

Assistant Superintendent wanted on Lone Tree GolfCourse located in Antioch. We are seeking a person with overall skills in all areas of Golf Course Maintenance. Medical and Dental Benefits provided. Salary based on experience. Please send resume to:

Wayne Lindeloff

Antioch Public Golf Corporation

P.O. Box 2115

Antioch, CA 94531

OUR HOST FOR JANUARY 1991

Our host Superintendent for January is Robert Leas, at Hidden Valley Lakes Golf Course. Robert is a graduate of University of California at Davis and worked in the landscape construction for ten years with Leisure Lawns. After spending one year in Boise, Idaho he returned to California as the Assistant Superintendent to Bob Tyler at Fountaingrove. He moved to Hidden Valley Lakes in 1989. Robert lists his hobbies as organic gardening, furniture building. He is a member of GCSAA, GCSANC and Sierra Nevada Superintendents Association.

Hidden Valley Lakes Golf Course is a men's par 72, 6237 yards with an average of 35,000 rounds of play and 120 tournaments each year. The # 15 tee is 190 foot elevation drop and recently rebuilt. The course was built by Boise Cascade as a housing project in 1968.

HELP WANTED

City of Sunnyvale announces an opening in the Golf Course Division of the Department of Parks and Recreation for Utility Worker/Golf. Under the general supervision, perform a variety of semi-skilled and skilled tasks in the maintenance, repair, construction and operation of golf courses, grounds and facilities; do related work as required. Since the golf course is open 7 days a week, the regular work week may include weekends.

Duties will be to operate various equipment involved in the maintenance of golf courses: mowers, light tractors with attachments, utility vehicles, front-end loaders, light equipment such as chain saws, weed trimmers and trenchers. Prune small trees and shrubs. May perform some tasks regularly assigned to senior-level classes, particularly on a training basis.

To qualify for this position any combination of education and experience equivalent to the completion of the eighth grade and two years of related parks, golf course or landscape construction and maintenance experience at the level of Maintenance Worker or above. Must possess a valid California Driver's License. Highly desirable qualifications include: possession of a California Pesticide Applicator's License, current golf course work history and knowledge of irrigation and golf practices.

TO APPLY complete a City of Sunnyvale application and supplemental questionnaire and return to the Personnel Department by 5:00 pm on January 7, 1991.

SMOKING TO BE PROHIBITED AT 'RECLAIMED' GOLF COURSE

Smoking will be banned at a new municipal golf course opening in December on reclaimed land in Tokyo Bay, to prevent the ignition of methane gas emitted from garbage beneath the golf course, according to an announcement by the metropolitan government.

The new golf course is being constructed on top of what was once a garbage dump site, according to metropolitan government officials.

The new golf course has been under construction in Koto-ku since 1988, at a total cost of Y5.5 billion. The 54 hectare course, was designed by professional golfer Ayako Okamoto.

Knowing that as large number of golfers will seek to play at the conveniently located course, the metropolitan government has formulated a set of regulations in an attempt to see that all users receive the same treatment, the officials said.

For instance, if users seek to play Saturdays, Sundays or holidays, they are to send in a postcard during the first week of the month which falls two months before their projected date of play. The actual users are to be determined by lottery on the 20th of each month.

Those golfers hoping to play on weekdays are to book the use of the course one month prior to the date of play. An individual golfer or a group is not allowed to make two reservations at a time, according to the officials.

The user's fee is Y 14,000 on weekdays and Y 18,000 (\$138) on Weekends and holidays. The fee, which is about half that charged by private golf courses, includes caddie charges.
