Sports Field
Managers Association of New Jersey

SFMANJ Has a Busy Summer in 2008

Lincoln Financial Field, Philadelphia, PA hosted a Summer Regional Conference sponsored by STMA on June 27, 2008.

STMA Regional Educational Event a Success

By: Kim Heck

Sports Turf Managers Association held a regional educational event and field day at Lincoln Financial Field (home of the Philadelphia Eagles) and Citizens Bank Park (home of the Phillies) on June 27, 2008. Six STMA-affiliated chapters supported the program: the Keystone Athletic Field Managers Organization (KAFMO); Sports Field Managers Association of New Jersey (SFMANJ); Sports Turf Managers of New York (STMONY); Chesapeake Chapter of STMA; Virginia Sports Turf Managers Association (VSTMA) and New England Sports Turf Managers Association (NESTMA).

Emcee Dan Douglas from the KAFMO chapter, kept the more than 160 attendees moving to the various events throughout the day. Dr. John Sorochan, University of Tennessee, started the program with a presentation about how new bermudagrass can successfully be grown in the transition zone. He also presented cool season turf management later in the day.

Jeff Fowler, Penn State Extension, challenged attendees to make personal changes to help them be better sports turf managers during his '7 Habits of Highly Defective Sports Turf Managers' presentation.

SFMANJ Summer Trade Show and Equipment Demonstrations

By: Brad Park

Sports Field Managers Association of New Jersey (SFMANJ) once again collaborated with New Jersey Turfgrass Association (NJTA) and Rutgers University to take part in the annual Rutgers Lawn, Landscape, and Sports Field Day at the Rutgers Adelphia Turfgrass Research Farm in Adelphia, NJ on July 30, 2008.

A morning trade show and equipment demonstrations were sponsored by SFMANJ. The trade show consisted of eleven vendors and saw significant attendee traffic between 7:30 and 9:00 am.

Education was provided by Rutgers faculty, staff, and graduate students and included information on new perennial ryegrass and Kentucky bluegrass varieties, updates on pesticide regulations, breeding for brown patch resistance in tall fescue, and broadleaf and grassy weed control.

As a new programming format for 2008, vendor-sponsored equipment demonstrations were incorporated into educational tours. This format proved to be successful as large numbers of attendees were present when the latest turf maintenance equipment was being operated for all to witness.
