

2020 CALL FOR PROPOSALS

BY USGA GREEN SECTION STAFF

The USGA Turfgrass and Environmental Research Program develops and supports non-biased research to help golf courses provide desired playing conditions, optimize resource use, and protect the environment. More than \$43 million has been invested to advance these goals since 1920 and the 2020 Call for Proposals will continue the 100-year tradition. Interested scientists should submit proposals by June 26, 2020, for consideration for funding from 2021-2023.

Visit the [Turfgrass and Environmental Research page](#) for more information.
