

## Emmi, New Turf Fungicide, Introduced by Velsicol

A new turf fungicide, said to be especially effective on dollar spot, has just been introduced by the Velsicol Chemical Corporation.

Designated "EMMI," the new fungicide is said to have little or no phytotoxic effect on St. Augustine, Zoysia, ryegrass, bahia, Bermuda, and centipede grass. Velsicol recommends 1½-2 oz. EMMI in 10 gallons of water per 1000 sq. ft.

Higher dosages should be used with caution, especially during hot weather.

EMMI is described as "quick acting and long lasting," and is easy to handle because its liquid form dilutes easily, and won't clog nozzles.

Velsicol says a gallon of the new substance is enough for 12 to 16 average spray jobs. In most cases, the firm claims, only one treatment is needed to clear up disease.

CAs who want more information about EMMI should write the manufacturer at 330 East Grand Ave., Chicago 11, Illinois.

## John Blue Machines Described

A complete catalog of sprayers, pumps, nozzles, and booms made by the John Blue Company, Inc., is now ready for applicators interested in reading of the firm's equipment.

"While we're primarily agricultural manufacturers," John Blue's, Michael Graznak, told *Weeds and Turf*, "much of our machinery is ideally suited for use by contract applicators."

CAs who want to know more about the company's products should write the firm at Huntsville, Ala., and ask for bulletin 7-D-2.

## Sheet on Broyhill Pump Ready

An informative, illustrated sheet describing the Broyhill 805-RL combination pump and tank spray unit can now be obtained from the manufacturer, Broyhill Company, Dakota City, Neb.

Broyhill says the 805 provides CAs with a convenient single-unit, high-low pressure sprayer, when both gun and boom options are selected.
