## **Suppliers Personnel Changes**

Kerr-McGee Oil Industries, Inc., Oklahoma City, Okla., promoted Joseph A. Oxford from field engineer to manager of its Pensacola, Fla., fertilizer plant and warehouse. Also promoted is Nathan D. Stringer, new sales manager of the Pensacola complex.

ITT Marlow Division vice president A. F. Woods, director of marketing, recently announced the promotions of O. L. Ericksen to product line manager; M. C. Bickert to sales manager; and R. D. Dickey to market specialist.

Water-In, Inc., Altadena, Cal., has added Prof. Talmy Giveon to its soils research staff. Prof. Giveon will supervise scientific soil tests, so that he can prescribe exact formulations of "Water-In" for specific problems.

## How Chem-Trol Eliminates Weed Control Callbacks

(from page 17)

rel Odle, "What we like about this herbicide is its versatility; it can be used as either preemergent or a post-emergent and gives season-long control of a wide range of weeds and grasses. So far this year, we have put out a lot of Prometone while the ground was still hard and frozen. Now, that the ground has thawed, the chemical has moved right into the weed-germinating zone for positive early control."

"Having a long period in which we can apply the herbicide means we can get many more income-producing months from our weed-treating experiment," Glen Tolman stated. "The fact that it is a liquid makes it a real timesaver. It mixes readily, stays in solution without agitation, and is compatible with all herbicide combinations we have used in the past."

"Let's not forget these costly callbacks," Odle warns. "Prometone has helped us to reduce them; it's effective on johnsongrass and other hard-to-kill perennials, as well as broadleaf weeds."
