

# WEEDS TREES AND TURF

## 1968 SUPPLIERS GUIDE

*Weeds Trees and Turf* presents below its annual Guide to Suppliers of vegetation control chemicals and equipment for use in urban/industrial areas. There is a mixture of common and registered trade names, unavoidable since usage and recommendations of researchers refer to a particular chemical by one or the other, depending upon the newness of the compound, whether its common name is easier to use, or industry acceptance. There will also be some differences of opinion over the inclusion or omission of certain chemicals under particular use categories. Here again confusion exists among reference sources. We have made our choices on the basis of most frequent mention in our surveys which preceded this compilation. Readers' comments and suggestions are invited to help us improve future editions. Keep this year's Guide handy for frequent use.

“Bluegrass on the rocks...  
not a drink,  
but the conditions  
we like to cut  
turf in”

FOR PRODUCTION SOD CUTTING—this turf cutter is designed and built to cut in rocky as well as normal conditions. It is built to withstand hard use, combining the oscillating blade of the small cutters with the dry ground advantages of the old style drag cutters. This cutter has yielded up to 30 square yards per min-

ute or 3 acres a day. Our turf cutter will fit most popular 3 point hitch systems, especially those tractors with large flotation tires. At your request we will loan you our 8 mm color film of this cutter in action.

## WITH A ROTAVATOR . . . "Germination is Better, Stands Superior"

"The Rotavator has definitely increased our turf yields . . . germination is better, stands superior, and we have fewer bare spots than we used to. We figure that our Rotavator saves from 30% to 40%

in operating costs over conventional equipment." Melvin Rich, of Richlawn Turf Farm, knows what a Rotavator can do for him. Fill out this coupon and see what a Rotavator can do for you.
