## Classifieds

When answering ads where box number only siven, please address as follows: Box number, c/o Weeds Trees and Turf, 9800 Detroit Ave., Cleveland, Ohio 44102.

Rates: "Position Wanted" 10 c per word, minimum $\$ 3.00$. All other classifications 20 c per word, minimum $\$ 4.00$. All classified ads must be received by Publisher the 10th of the month preceding publication date and be accompanied by cash or money order covering full payment.

## FOR SALE

For Sale: Daymon Sod Roller, used, 24inch, excellent condition, $\$ 3000.00$. Green Acres Turf Farm, Inc., 1663 Holt Rd., Mason, Michigan 48854. Phone 517 676-2362.

NEW AND USED HOMELITE chain saws and John Bean sprayers. Hardie 50 gallon sprayer, $\$ 200.00$; Bean 55GPM pump, $\$ 200.00$; Homelite XL$12, \$ 100.00$; KWH Mistblower-duster, $\$ 125.00$. Write for current bargains. Lanphear Supply, 1884 S. Green Rd., Cleveland, Ohio 44121. 216 381-1700.

## WANTED TO BUY

SPRAYING COMPANY in Ohio, now doing utility, highways, railways and industrial work wants to buy or merge with established company. Box 29 , Weeds, Trees and Turf, 9800 Detroit Ave., Cleveland, Ohio 44102.

## South Dakota Growers

(from page 27)
per cent other native species and 5 per cent inert material.
However, Colburnreports, samples collected during late summer are being reported out of the laboratory well above these minimums. These have a test weight of 26 to 28 pounds per bushelindicating a heavy plump seed which should have good seedling vigor.
For instance, one large lot carried an inspection report of 98.99 per cent purity, 1.01 per cent inert matter, 95 per cent germination, with no other crop or weed seeds present.
"Our producers intend to maintain this high standard," Colburn adds, pointing out that the upper Great Plains' climate and environmental conditions (including temperatures ranging from 38 degrees below zero to 118 degrees above) prevent non-hardy types from surviving. Annual Bluegrass (Poa Annua) is not found in the South Dakota plains area. A vigorous natural selection process that goes on all the time keeps annual bluegrass out of this hardy Kentucky bluegrass sod.

Poa annua, an annual reseeding bluegrass declared noxious by several states, is a troublesome weed in lawns and turfs. It has very erratic growing habits (rapid growth in cool weather and quick disappearance in hot weather). Scattered infestations show up as rough dry patches of dead grass by middle summer in otherwise green lawns and golf courses. All of the new South Dakota certified seed is guaranteed free of noxious weed seeds.

Cleaned seed will not be tagged until each lot is completely processed, Colburn says. During the cleaning process, pint or 200 gram representative samples are taken. Lot volume is restricted to a maximum of 10,000 pounds. The lots will also be spot sampled before the South Dakota Crop Improvement Association seal and tag are affixed. Approximately 8,451 acres were certified in South Dakota this year, Colburn says. Seed may be obtained from the S.D. Bluegrass Assn., Box 873, Huron, S. Dak.

## New Bermudagrass Released By Clemson University

A new bermudagrass has been released by Clemson University, Clemson, S.C. Known as Pee Dee 102 , the new grass is a fine stemmed type which is expected to be useful on lawns and golf greens.

John B. Pitner, Clemson agronomist who did the selection and testing, reports that the grass is a mutation from an early South Carolina planting of Tifton 328. He made the selection from turf on a Florence, S. C. golf course.
Pitner says that the new bermudagrass is darker green in color, gives coverage more quickly, and has added disease resistance. It has fewer seed heads following stress conditions, and less upright growth than the parent Tifton 328 variety. Pee Dee 102 is completely male-sterile and does not produce viable seed. Grass is increased by sprigs.

Vegetation propagating sod is available at the Pee Dee Experiment Station, Florence, S.C., and at the Sandhill Experiment Station, Pontiac, S.C. Application to receive this sod must be made to the South Carolina Foundation Seed Association, Clemson, S.C.

## Shade Tree Symposium Set For Penn State University

A 3 -day symposium on shade trees has been set for Feb. 7-9 at Pennsylvania State University, University Park, Pa. This will be the third annual event of this type held by the University and the Pennsylvania-Delaware Chapter of the International Shade Tree Conference.

Dr. J. Robert Nuss, Extension Ornamental Horticulturist at Penn State, says formal sessions will include plant selection, air pollution, shade tree commission problems, and tree care. Program plans center on problems of community officials, shade tree commissioners, civic groups, garden clubs, nurserymen, arborists and citizens interested in trees.

## Reflector Landing System

 (from page 19)the plane is normally adequate for use with the system. The 100 watts at 12 volts which is considered the minimum needed for aircraft will pick up the reflectors well over 1 mile from the strip. The 200 -watt units which are found on most aircraft pick up the reflectors 2 to $21 / 2$ miles out. Slight fanning of the rudder enables the plane light, once the pilot is in the approach zone and within range, to pick up the reflector lanes.
Lights on the plane have to be of the clear lens type, rather than the prism lens found on some planes. Lights also need to be set at a $7^{\circ}$-approach angle to match the $7^{\circ}$ angle of the marker mountings. This angle is standard on most planes, but adjustments must be made on the Cherokee and Piper Tri-Pacer, as well as a few other types.
