

At Last... An Answer to Thatch Problems!

Thatch... a relatively new term, but a growing problem each year. We, at "Blue Bird", recognized the need for mechanical means of solving this thatch situation years ago.

Turf Management Headaches

We had learned from turf authorities that thatch meant many things, each a headache to turf management: plant growth was hindered; fertilizers couldn't reach the soil; water penetration was inhibited. Plus the fact that this matting provided an excellent environment for disease. Yet no means of removing it was available except the back-breaking chore of using a hand rake.

Machine Built to Do the Job

Thus the "Blue Bird" Lawn Comber was born. And from its beginning, it was built to do the job *you* want it to do. We made it durable... a unit for commercial use. Flexible blades *comb*
