Oregon State Accelerates Testing of New Herbicides

In an effort to speed up the development and safe use of effective herbicides, Oregon State University researchers are involved in a fast-paced program of evaluating new herbicides.

Fifty-one chemical companies from the United States, England, Germany, Switzerland, Japan and France—producing new chemicals at the rate of 150 per year—are cooperating.

The program's intent is to bring together all new herbicides produced by the world chemical industry that are still in an early stage of testing. The chemicals are then

compared under as many conditions and on as many crops and weeds as necessary to adequately assess their potential.

By testing herbicides in Hawaii and South America, in addition to Oregon, researchers can obtain three seasons of information in one year. The program hopes to reduce by a year or more the time it takes for a promising chemical to become available on the market. Currently it requires five years or more.

No secrets are kept on any findings . . . information is available to anyone, say program director Dr. W. R. Furtick, Oregon State Professor of Farm Crops, and his assistant, L. C. Burrill.

Industry People On the Move

Rain Bird Sprinkler Manufacturing Corporation, Glendora, Calif., appoints H. Gary Underhill vice-president of marketing. He had been hardware sales manager and market development manager since 1964.
