

Lindig Mfg. also offers a steam aerator and a soil cart. The aerator provides low-temperature steam sterilization that does not harm beneficial soil pathogens. Steam is injected into the soil cart at a temperature range between

145 and 165 degrees for a period of 30 minutes. As the chart indicates, most plant-damaging micro-organisms, insects, viruses and weeds can be destroyed. The aerator and cart come in two sizes.

pathogens are not destroyed, and soil nitrates are not leached out.

"The aerated steam system provides the user with a positive method of obtaining and controlling the temperatures that are required for treatment of various soil mixes. The soil is well aerated, not toxic, free of added moisture . . . the net

result is that recontamination possibilities are lessened, and stronger and better plants are produced in less time and at lower cost."

Lindig, the newest of the four shredder manufacturers, began operations in a dairy barn shortly before the U.S. entered WW II. After the war, expansion of the family

business was steady.

When the plant was moved to its present location about 15 years ago, some friends questioned the wisdom of the move "to the country."

"When we asked for telephone service, all that was available was a party line with a construction firm and a nursery," said John. The Lin-
