Weed Science Society of America. Statler-Hilton Hotel, Dallas, Tex. Feb. 8-11.

FIRST WITH DIESEL ENGINE POWER

SAFETY TEST
HEAVY-DUTY

WOOD/CHUCK®

12 & 16 inch
CHIPPERS

NOW AVAILABLE WITH GASOLINE OR DIESEL ENGINES

So what? Advantages of diesel over gasoline power have been known for many years, adapted to power many machines. Now, for the first time. Safety Test Wood/Chuck brings those advantages to wood and brush chippers. What are they? Low fire hazard. Low fuel consumption. Low emission level—that translates to less pollution. Greater lugging power. No electrical ignition system with attendant moisture and service problems.

What else puts Safety Test Wood/Chuck in a class by itself? First in performance, economy, and safety—that's all. There's less down-time for blade adjustment and replacement, for example. Wood/Chuck's blades lock into the rugged rotor and automatically position properly. This takes just minutes; often requires hours with other chippers. Wood/Chuck's blades are "V"-grooved for full-length support that means extra safety.

Only Wood/Chuck has really been built from the ground up as a chipper for heavy-duty use. Frankly, there are dozens of reasons why no other chipper compares. You owe it to yourself to get the full story from our Wood/Chuck representative, or write Safety Test & Equipment Co., Inc., P.O. Drawer 400, Shelby, N.C. 28150.
