# THE ONLY FERTILIZER PACKET SYSTEM

Unmatched for long term feeding

The fertilizer packet is a system of fertilization.

It offers plant nutrients to the target plant in such a way that nutrient loss is minimized, nutrient utilization is maximized, fertilizer damage to the plant is averted, and costs of labor and supplies are reduced.

Can you imagine — no maintenance, no labor expense for 1, 3, 5, 8 years, no burning, no waste, no mixing, no measuring! You don't lift one finger, ever, for fertilizing, only one green thumb for counting your dollar profits.
