Dr. James, formerly assistant director of horticulture at Callaway Gardens, Pine Mountain, Ga., will coordinate research for nursery and ornamental plants and turf for residential developments, golf courses, and other recreational uses. He also will help supervise aquatic weed control and equine piroplasmosis research programs.

\* \* \*

**JAMES GARRISON** is manager of applications engineering for the commercial marketing department at Textron's Bell Helicopter Company.

# the *Luxury Grass* Highland Colonial Bent

Just possibly, Highland Colonial Bentgrass is the greatest value in grass seed today. It's one of the most economical of the fine-bladed varieties and has every attribute required for a truly luxurious lawn or turf. With some 8 million seeds per lb., the potential number of plants is great.

Highland can be seeded alone or in mixtures with other fine-bladed grasses, is free of noxious weeds and *Poa Annua*, and will thrive even when close cut to 1/4 inch.

For years it has been used in overseeding programs because it retains excellent color in cold weather when Southern grasses are dormant.
