ON A 90-DEGREE DAY, baseball and football players can expect to play in temperatures up to 123 degrees if artificial turf is under foot. That's the finding of testing in Busch Stadium, St. Louis, and corroborated by similar data from the Orange Bowl, Miami.

Bill Simmons of the St. Louis football Cardinals said that on one day when the official temperature was 90 degrees, the field surface temperature was 123 degrees. It was 116 degrees at one foot and 114 degrees at six feet.

Testing by the Miami News produced similar conclusions. Artificial grass gets about 20 degrees hotter than natural turf, the News said. At an air temperature of 93 degrees, natural turf remaining in the stadium pushed the mercury to 96 degrees. Where the artificial grass had been installed, the temperature was 116 degrees.

Contractors. The group has proposed a law that would require landscape contractors to meet certain qualifications and apply for a license through the Oregon State Agriculture Department. Ronald Vandehey of Portland, original president of the group, said the move was to protect the public from "fly-by-night" operators.

DENVER, COLO., has had more than one fight on its hands over Dutch Elm Disease. The scourge has invaded the city's estimated 200,000 elms, or 60% of the total tree population. Some 3,000 have been determined by infrared aerial photography to be diseased. Tree experts believe the total could skyrocket to 20,000 to 30,000 in the next few years. Sanitation is essential to reducing the spread of the disease, including tree removal and destruction. But pollution proponents managed to ban open burning last January. The problem had been on how to dispose of the trees, for mere stockpiling of dead trees wouldn't eliminate the brooding places for the elm bark beetle. Verbal fighting has been torrid, but as of the first week in August the state health department issued special burning permits for destroying the dead and dying trees.

0217®

RAH! RAH! RAH!

Cheers can be heard all over the north temperate zones of the world for this giant among lawn seeds. Outstanding on all counts, Fylking Kentucky bluegrass is resistant to a wide range of diseases, including leafspot and stripe smut. Drought and winter tough, fine leaves of deepest emerald green grow in unusual density due to abundant sideshoots. Fylking produces no ugly seed-heads, can be cut low as ½ inch for home putting greens, ¾ inch for velvety carpet-like lawn. All facts proven in 12 years of international testing by noted authorities. Next lawn, seed or sod with 0217® Fylking Kentucky bluegrass (U.S. Plant Patent 2887). At your seed distributor. Write Jacklin Seed Co., Dishman, WA 99213 for information.
