

longer in the fall. In southern areas, it retains beauty the year around. It is a little darker than Merion in color, its leaves are slightly more narrow than Merion and have an upright growth characteristic. A-20 does well at almost any mowing height from $\frac{3}{8}$ -inch to two inches. Of particular interest to sod growers, it promises to be a money maker because when sod of A-20 is stripped from the growing fields, it grows back from the rhizomes extremely fast. Several of Warren's branch nursery managers report producing two crops of A-20 in the same growing season.

Both A-20 and A-10 must be planted vegetatively with plugs. The plants that develop from seed do not carry on the fine characteristics of the parent plants. Machines capable of planting up to 10 acres per day are in use and can be rented from Warren's.

All three of the Warren grasses are rated high in resistance to turf diseases. An additional note of interest was reported recently from one franchise grower who said that the only grass in his area that sod web worms would not eat was A-20.

Warren plans no expansion into Canada, stating that the reason is Canada's failure to provide plant protection patents. Bob Warren expressed interest in an English market, citing the amount of population in such a small area and the Englishmen's love of a beautiful lawn. An Italian nurseryman approached Warren's recently and plans to establish a turf operation in Northern Italy.

Cal-Turf Introduces A New Turf Colorant

A new turf dye has been introduced by Cal-Turf, Inc., Camarillo, Calif., for use on all dormant turf including Bermudas, St. Augustine and Zoysias.

Called Cal-Verde, the dye was developed by Cal-Turf researchers to provide lush green turf color in a long-lasting, easily applied form.

Once dry, Cal-Verde will not stain clothing or shoes, and one application normally lasts a full season. The new product is also excellent for dressing up growing turf, such as for shows, grand openings, etc., according to Paul Ledig, Cal-Turf Sales Manager. In these applications it is used half-strength.

Cal-Verde is sold in one quart cans (one quart covers 1,000 square feet). For more information, circle (721) on the reader service card.

LANDSCAPE RAKES

For Working Soil • Grading • Finishing

CHOOSE FROM TWO MODELS

For close work against buildings, fences, and other obstacles, Servis' Little Rhino Landscape Rake—with its exclusive offset features and heavy duty main frame—is unsurpassed for speed and performance. Where offset features are not required, the lighter main-framed Lone Star Landscape Rake is recommended. Whichever model you choose, you will find it to be one of the most usable and productive implements you have ever owned!

Servis

LITTLE RHINO INDUSTRIAL DITCHING & TERRACING BLADE

There's a world of difference in a Little Rhino! Doesn't drag. It Cuts! Gives you the edge in ditching... terracing... leveling. Offset right... offset left... by merely pulling one pin. Tilt 45° or more... without using a wrench! Rugged 6' grader blade standard (double 6' extension boots available). Wide 8' blade also available. For 3-point lift tractors with 20-55 hp drawbar ratings.
