

lated to case histories, were discussed by participating members. Micha's committee is in the process of developing a more standardized form for reporting on tree surveys and appraisals.

At the final business session, new officers and directors were elected. Ray Gustin, Jr., handed over his gavel to incoming President George W. Goodall, Maine, and welcomed President-Elect Dr. L. C. Chadwick, Ohio; Vice-President Walter P. Morrow, Pennsylvania and Secretary-Treasurer W. Roland Shannon, Pennsylvania. The directors named for the coming year were O. J. Andersen, Texas; A. Murray Swanson, Arizona; F. L. Dinsmore, Missouri; F. Earle Martin, Toronto, Canada, and Ray Gustin, Jr., Maryland. Dr. Spencer H. Davis, Jr., New Jersey will continue as Executive Director.

ASCA members will meet next in conjunction with the International Shade Tree Conference in Montreal, Canada in mid-August.

Plans Underway for I.S.T.C. At Montreal, August 7-14

The 47th annual meeting of the International Shade Tree Conference is set for August 7-14 at Montreal, Quebec. Headquarters will be the Queen Elizabeth Hotel.

Executive Secretary E. C. "Cal" Bundy (P.O. Box 71, Urbana, Ill. 61801) is equipped to furnish details for members, exhibitors, and others interested in tree care who wish to attend.

Dr. E. B. Himelick, executive director of the I.S.T.C., is program committee chairman and Dr. Yves Desmarais, the Montreal local committee chairman. Four special events in addition to the regular educational program have been scheduled. These are: (1) A special "Exhibitors Nite" rather than field demonstrations. Purpose is to allow exhibitors to display their products in addition to entertaining via prizes, games, etc.; (2) An evening break-away event. This will include an afternoon trip to the site of the Montreal World's Fair, and an I.S.T.C. street dance in Old Montreal in the evening; (3) A second evening is set aside for two special presentations, one by Clarence Lewis of Michigan State University, and the other by Stauffer Chemical Company; and (4) Post-convention trips are planned for Europe (2 weeks), Quebec City (overnight), and for Ottawa (1 day).

Special programs are also on the agenda for wives and youngsters.

Both are steeped with French enchantment and the Montreal atmosphere.

National Attention Focused On Aquatic Weed Meeting

Featured speaker for the Hyacinth Control Society's '71 annual meeting will be the Environmental Protection Agency's regional coordinator for Region IV, Mr. John R. Thoman. Thoman will appear July 12 and will present EPA's procedure for determining pesticide use in the months ahead.

Every company producing equipment and chemicals for aquatic weed control will have representatives on hand for this conference at Tampa, Fla., this coming month. Besides company representatives, the membership consists of contract applicators, research scientists, and all types of supervisory personnel responsible for keeping waterways and surface reservoirs free of all types of noxious aquatic weeds.

The national session is set for July 11-14. Headquarters will be the Manger Motor Inn (details available from Stanley Abramson, president of the Society, P.O. Box 1096, Tampa or tel. (813) 626-2111).

Abramson reports the Society board is inviting anyone with an interest in aquatic weed control. Registration is well ahead of last year's session at Huntsville, Ala. Abramson says the current reservation list indicates that representatives from some 35 states and 6 foreign countries will be on hand.

Papers are submitted each year by the membership as well as field men and scientists outside the organization. Among those featured this year will be Dr. Alva P. Burkhalter, Director of Aquatic Weed Control for Florida. His paper is entitled, "Policy and Plans of the Department of Natural Resources Related to Aquatic Weed Control and Research." This is especially appropos in light of proposed legislation in Florida to ban all use of pesticides in that state's waters by 1973.

L. V. Guerra, project leader for statewide noxious weed control in Texas, will discuss "Reclamation of Lost Recreation Areas." These are only two of some 40 papers to be presented.

Besides the educational program and field demonstrations, a full program is planned for families. Special rates have been arranged at the headquarters hotel (\$12 single and \$17 double or twin).

Daconil 2787® fungicide helps you build a strong turf program. It checks leaf spot, dollar spot, brown patch and many other fungus diseases without harming your grass.

Daconil 2787 fungicide has been field tested world wide. It has shown high weather resistance. And moves to protect new growth between sprays. Always read the label before using.
