TURF INSECTS

A BILLBUG

(*Sphenophorus phoeniciensis*)

CALIFORNIA: Adults 15 per square yard in Tifgreen lawn at San Diego, San Diego County.

A MARCH FLY

(*Dilophus orbatus*)

CALIFORNIA: Larvae heavy in lawns at Santa Maria, Santa Barbara County.

INSECTS OF ORNAMENTALS

A CONIFER APHID

(*Cinara tujafilina*)

OKLAHOMA: Increasing on Payne County arborvitae. Older, undisturbed colonies range up to 75 aphids each and many small, newly formed colonies found in favorable locations. Numbers of alate aphids increased slightly but this stage still not common.

WHITE PEACH SCALE

(*Pseudaulacaspis pentagona*)

VIRGINIA: Severe and widespread on Kwansan cherry in City of Alexandria.

IVY APHID

(*Aphis hederæ*)

OREGON: Nymphs and adults spotty, mostly adults found on young shoots of English ivy at Salem, Marion County. This is a new state record.

TREE INSECTS

PEACHTREE BORER

(*Sanninoidea exitiosa*)

TENNESSEE: Infestation light but tree damage heavy on flowering almond in Warren County.

AN ERIOPHYID MITE

(*Eriophyes canestrinii*)

OREGON: Heavy under leaf scales of boxwood at Corvallis, Benton County. This species forms small flower gall but generally not considered injurious to host. This is a new state record.

PINE TUBE MOTH

(*Argyrotaenia pinatubana*)

MISSOURI: Larvae collected from white pine at Chesterfield, St. Louis County. This is a new state record.

PITCH PINE TIP MOTH

(*Rhyacionia rigidana*)

MISSOURI: Collected at Licking, Texas County, on loblolly and shortleaf pines. This is a new state record. The following are new county records: Elsberry, Lincoln County; Willow Springs, Howell County; Eugene, Miller County; and Gladden, Dent County on shortleaf pine.

ASIATIC OAK WEEVIL

(*Cyrtepidomus castaneus*)

MISSOURI: Adults collected from oak in Dallas County. This is a new county record.

ENGRAVER BEETLES

(*Ips sp.*)

CALIFORNIA: Infested knobcone pine saplings and poles in two stands of 1,000 to 1,500 acres in Coffee Creek area, Shasta National Forest. About 5,000 trees involved.

The Drip

What makes "The Drip" effective and the SAFEST way for weed control?

With ordinary sprays and mists, coverage is inconsistent and dangerous at best, especially in confined areas where flowers, shrubs and other foliage is vulnerable. But "The Drip" utilizes a continuous film dripped onto a roller to make application. This direct contact gives you positive control and superior coverage, and avoids drift of spray.

"The Drip" is available in 3 models for covering any area, A self propelled hand model, a model "101" pull-type as illustrated, or the King-size gang of three 101 units which covers a big 9-foot swath. Write today for literature and complete details. Rubber covered rollers are available for special applications. Pat. No. 3408149
