The Cover

New for the industry is the Earth Saw, introduced by the Ditch Witch Division of Charles Machine Works, Perry, Okla. Shown here, it is actually sawing out a trench for irrigation lines through Florida coral. It has also sawed its way through 8-inch reinforced concrete and is especially recommended for working frozen ground. Equipped with special carbide teeth, the unit comes in two sizes, one cutting to depths of 24 inches, a larger one up to 30 inches. Both units open 4-inch wide trenches. Teeth revolve during trenching. See story, page 34.

WEEDS TREES and TURF is published monthly by The Harvest Publishing Company, subsidiary of Harcourt Brace Jovanovich, Inc. Executive, editorial headquarters: 9800 Detroit Ave., Cleveland, Ohio 44102.

Single Copy Price: \$1.00 for current and all back issues. Foreign \$1.50.
