What We've Been Waiting For Is Here! — An Innovation That  
Strikes a Giant Breakthrough in Seed Technology.

### PRE-GERMINATED GRASS SEEDING

sample of millions  
of Germinated Plantlets

# LAWN ● ★ MEDIC

Lawn Medic's process economically  
produces plantlets, makes for easy  
handling, storage and application.

### Your gain by using Germinated Seed.

- 1,500 - 2,000% less water when germinating grass seed.
- Weather and Seasons no longer critically affects planting time.
- Quick cover on slopes, hard to establish areas.
- Greater use of superior varieties, (normally taking longer to establish and gain full coverage.)
- No excess seeding rates, all grasses come up as specified by GERM TESTS.

Plantlets come in bags to cover a given area. Specialized mixes or straight varieties are pre-germinated.

**SELECTED VARIETIES, TIME FOR EMERGENCE\*** through soil surface after planting.

Bermudagrass — 3 days	Prato, Baron — 5 days
Merion Blue — 8 days	Bentgrasses — 3 days
Newport Ken. — 5 days	Ken. 31, Rye — 4 days

\* Certain variety mixes will emerge in 1 - 2 days.

PRE-GERMINATED GRASS PLANTLETS U.S. Patent Pending.

## Cuts twice as fast as most lawn tractors, hugs the ground for hillside safety

### NATIONAL 68-inch Triplex

Mows a 68-inch swath at speeds up to 4 miles per hour, a half acre in 15 minutes.

It's a turf-professional type mower, with three powered, free-floating reels that follow ground contour. It shears grass cleanly; doesn't leave unsightly "tip burn" as rotaries often do.

Reduces trimming time because the reels reach out over curbs, up to obstructions and in other hard-to-cut places.

Built to last—with Timken bearings, automotive-type transmission and a lip on the cutter bar to take years of wear.

Do your lawn job in about half the time and do it better with the all-mower mower, the National Triplex.

Other models from 25 to 84-inch cut.

# It's not just another slicing machine

IT DOES MUCH MORE... IT PROVIDES **TOTAL TURF AERIFICATION**  
 ... In a single pass, the new Howard TURF-QUAKER will completely  
 relieve compaction, remove excess thatch, and open the soil for water  
 and nutrients. It uses a unique auger-like blade pattern that slices into  
 compacted turf, rapidly moving it from side to side with a firm shaking  
 action that loosens it down to the roots. The turf is left completely open  
 to all the water and nutrients it needs.

TURF-QUAKERS are available in  
 tractor-mounted and hand operated  
 models. For complete information

## **BECK'S BIG ROLL SOD HARVESTING AND LAYING SYSTEM . . . For Progressive Sod Growers**

Harvest, load, and lay sod FAST, without manual lifting or handling. Let tractors do the hard work. Hand stacking and laying of sod is obsolete. Increases sales by cutting time and cost of installation. Stretches sod 3% to 5%, leaves lawns smoother, with fewer seams and joints. Disposable cardboard tubes are lighter and cheaper than pallets, permit easy loading, as many as 3 rolls at a time, with any fork lift, laying with any tractor.

No need to change over completely. Switch from Big Rolls to your present system in 5 minutes or less. This simple, rugged system can be had for as little as \$100/month.

## SAFETY TEST HEAVY DUTY **WOOD/CHUCK**®

Okay. But what puts Safety Test Wood/Chuck in a class by itself where chippers are concerned? Just superior performance, economy and safety.

First, there's less down-time for blade adjustment and replacement. The Wood/Chuck's blades lock into the rugged rotor and automatically position properly. This takes just minutes for a Wood/Chuck but often requires hours with other chippers. Wood/Chuck's blades are "V"-grooved for full length support that means extra safety. And where most "chippers'" blades are so positioned that chips are actually crushed away . . . the Wood/Chuck's shallow blade angle slices chips away. Goodbye friction, wasted energy and vibration; jobs go faster, fuel goes farther.

Only the Wood/Chuck has really been built from the ground up as a chipper for heavy-duty use. It's modern, functional, no-nonsense design sets it apart. Above all, the Safety Test Wood/Chuck has that built-in Safety Test "Extra Measure" of dependability. You can rely on it to do a full day's work . . . day after day, year after year. Frankly, there are dozens of reasons why no other chipper compares with the Wood/Chuck. You owe it to yourself to get the full story from your Wood/Chuck representative or write Safety Test & Equipment Co., Inc., P.O. Drawer 400, Shelby, N. C. 28150. Tel. (704) 482-7346

# ALGAE CONTROL

in ponds, lakes, lagoons, reservoirs,  
irrigation canals and water holes on  
farms, golf courses, nurseries and parks.

MILWAUKEE, WIS. Scientists at Great Lakes Biochemical Co., Inc. have recently received registration from the EPA for ALGIMYCIN PLL-C.

A new formulation, ALGIMYCIN PLL-C remains soluble over a wide pH range and is most effective when applied directly to the algae mats, either by spray on the surface or injected on the bottom of the body of water.

ALGIMYCIN PLL-C is not toxic to most common fresh water and tropical fish, desirable aquatic plants, animals, birds or pets, when used as directed. However, it is such

an efficient algicide that bodies of water with heavy algae infestations should be treated in sections so as to prevent oxygen depletion caused by large quantities of dead and decaying algae.

Economical and easy-to-use, ALGIMYCIN PLL-C makes green, slimy ponds clear and sparkling again.

Write Dr. "Bob" for more information on how to clear up ugly slimy waters.
