PORTA-SPAN® BRIDGES . . . moveable - - erect in 2 hours

You can fully utilize the natural settings of your recreational areas by setting a Porta-Span® bridge across the gulleys or creeks. One man can erect this bridge in less than 2 hours. No footings are needed. They can be moved from one area to another.

The Porta-Span® bridge is dipped . . . not just painted . . . with a wood preservative for weatherproofing. The arched beams are laminated. A 10-gauge galvanized steel plate is bolted to the underside of

each beam. These sturdy bridges have a maximum vehicle load limit of 2500 pounds or 15 persons.

They are available in 3 and 5-foot widths with lengths of 8, 12, 16 and 20 feet. You have a choice of a wooden railing (as shown above) or a chain and steel post railing. Write for complete details and specifications on the Porta-Span® bridge. Free, descriptive literature available upon request.
