Weed Control Western Style	11
<i>Pierce county, Washington, is one county where practically every known vegetation problem exists. Harrison Ford, county weed supervisor, has dealt a decisive blow to weeds and grasses. His county weed program has amassed a record of accomplishment which many other states may well envy.</i>	
Fertilizer from Animal Wastes	15
<i>Organic chemicals and animal wastes team up to make a compost fertilizer that is in much demand by golf superintendents and others.</i>	
Why Power Saws Fail	16
<i>If your power saw has let you down in the middle of an important sawing job, read this informative article. Author Hank Harvey combines his experience and technical knowhow to present the "How's" on avoiding trouble with your saw.</i>	
A Business With A Future	20
<i>Chem-Trol, Inc., a Kansas City, Kan. based firm, has specialized in the complete job of weed control. Business is booming and the staff is on the run most of the time. They find that every job requires at least three different chemicals.</i>	
Slow Release Nitrogen — Golf Course Labor Saver	22
<i>Maintaining good fertility on a golf course in an area where air and water pollution is a problem is a job in itself. Golf superintendent Dick Viergever, who manages the Sunnyvale Golf Course in California has found that slow release nitrogen improves his turf and reduces high labor costs.</i>	
Victorious War on Brush	24
<i>Here's a report on how brush species are succumbing to a relatively new brush control chemical called Banvel. It has shown activity on nearly every known specie of brush in the U.S. Velsicol Company experts report excellent control in Alabama, Louisiana, Texas, Maine and elsewhere.</i>	
Hyacinth Control Society Report	28

The Cover

September is a good time to see results of earlier herbicide applications. It's also a time to plan next year's weed control program. Many applicators find that fall applications of chemicals reduce the unsightly brownout. Our cover shows the results of bare ground applications, selective weed control, utility rights-of-way herbicide applications and the familiar mixing scene.

WEEDS TREES and TURF is published monthly by The Harvest Publishing Company, subsidiary of Harcourt Brace Jovanovich, Inc. Executive, editorial headquarters: 9800 Detroit Ave., Cleveland, Ohio 44102.

Single Copy Price: \$1.00 for current and all back issues. Foreign \$1.50.

Subscription Rates: WEEDS TREES AND TURF is mailed free, within the U.S. and possessions and Canada, to qualified persons engaged in the vegetation care industry and related fields in controlled circulation categories. Non-qualified subscriptions in the U.S. and Canada are \$10.00 per year; other countries, \$12.00 per year. Controlled circulation postage paid at Fostoria, Ohio 44830.
