GREATEST SPECTACLE

(from page 44)

ment student, University of Massachusetts, Amherst, summed up many of the feelings of turfgrass students about their future. He said, "When Dr. Troll (Univ. of Mass.) greets a new freshman class each year, he passes on this bit of information, 'You have to think turf, sleep turf, eat turf, or in other words, you have to be some kind of man to succeed in becoming a golf course superintendent,' I believe there always will be a place in this field for a person who orients himself towards Dr. Troll's beliefs."

New president of the Association for 1973 is Clifford A. Wagoner, superintendent at the Del Rio Golf and Country Club, Modesto, Calif. Other officers are: Charles G. Baskin, superintendent, Country Club of Waterbury, Conn., vice-president; Palmer Maples, Jr., superintendent, The Standard Club, Atlanta, Ga., secretary-treasurer. New directors elected are: George W. Cleaver, superintendent, Chestnut Ridge Country Club, Lutherville, Md.; Gordon C. Witteveen, superintendent Northwood Country Club, Toronto, Canada.

Site of the 1974 meeting is the Anaheim Convention Center, Anaheim, Calif. This will be the 45th annual meeting. Dates are: February 17-22. \Box

Design Changes Complete Says Lockwood's Dan Walter

The Lockwood Corporation of Gering, Nebraska, has announced completion of its long-rang program to restyle and re-engineer the Lockwood-Hardie line of shade tree and utility sprayers.

According to Dan Walter, Product Manager for the sprayer line, Lockwood has been making gradual improvements in the Hardie line of sprayers since purchasing it two years ago. One major improvement is stainless steel tanks as standard equipment on air blast sprayers to increase their longevity and reduce maintenance. Another is their lower profile design to improve overall maneuverability, prevent sliding and make the sprayers easier to pull.

Walter further announced that Lockwood is now holding training seminars for dealers regarding new features of the Lockwood-Hardie line. One point being stressed to dealers at the seminars will be the importance of new equipment field demonstrations at the user level.

Varieties Resistant To DED Studied At Mich. State Univ.

Arborists will soon be able to replace trees lost to Dutch Elm Disease with a disease-resistant elm variety, according to a Michigan State University forestry specialist.

Within the next decade, an elmbreeding project begun in 1969 at MSU should produce a suitable variety that resists the fungus disease, says Dr. Jonathan Wright.

One type, the Siberian elm, has already proven disease-resistant. But it tends to break down during ice storms and has neither the large leaves nor desirable shape of the American elm, Wright notes.

"We are screening over 600 elm samples from 200 countries, including Bulgaria, Siberia and Japan, to locate a variety that shows resistance to the disease, rapid growth, longevity and good form," the forestry specialist says.
