

## Irrigation Consultants Elect New Officers

The American Society Of Irrigation Consultants has announced new officers for the 1973 term.

George Bell was installed as president, Richard Kirby, vice president, and Ron Sherman Secretary-Treasurer.

ASIC is starting its third year. The purpose of ASIC is for the advancement of education and skill in the art of irrigation design and consultation as an instrument of service in the public welfare, and to promote honest and ethical professional practices.

## Purdue Turf Students Receive Scholarships

Three Purdue University students majoring in turf studies received scholarships at the Midwest Regional Turf Conference recently.

Recipient of the Golf Course Superintendents' Association scholarship worth \$500 was Lyle R. Heath, West Lafayette, Ind.

Other scholarship winners were James W. Uptgraft, West Lafayette,

Lyle R. Heath (l) of West Lafayette, Ind. discusses turf studies with Kenneth R. Griepentrog, Tulsa, Okla. and James W. Uptgraft, West Lafayette, Ind. All were scholarship winners at the Midwest Regional Turf Conference.

and Kenneth R. Griepentrog, Tulsa, Okla. Uptgraft received \$250 and Griepentrog, \$150.

These scholarships—given for the first time—were from a fund established by former Purdue turf students as a tribute to Dr. W. H. Daniel, Purdue turf specialist.

Elected 1973-74 officers of the Midwest Regional Turf Foundation, sponsors of the conference along with Purdue's department of agronomy, were Dudley Smith, superintendent, Silver Lake Country Club,

Orland Park, Ill., president; James Timmerman superintendent, Orchard Lake Country Club, Orchard Lake, Mich., vice-president; and W. H. Daniel, Purdue turf specialist, executive secretary (re-elected).

New directors are David S. Ralston, Miller-Wihry-Sabak-Wilson & Lee, Louisville, Ky.; John Spodnik, Westfield Country Club, Westfield Center, Ohio; and Donald Clemans, superintendent, Wabeek Development Co., Bloomfield Hills, Mich.

**Certain-teeed makes  
the 2nd best irrigation system you can get.**

First best, we'll admit, is a good soaking rain. But an underground system using Certain-teeed PVC pipe comes in second to nothing else.

**Economy.** The overall installation cost is less. Lightweight PVC requires no special handling machinery. Joints are quickly and easily made. You get a choice of FLUID-TITETM double-gasket joints, or deep-socket, solvent-weld joints. Fast installation saves money.

**No maintenance worries.** In the ground, PVC pipe is inert. It won't corrode, rot, or rust. Joints don't leak. And non-metallic PVC never needs protection against electrolytic action.

**More water for less pressure.** Smoothbore PVC is free of bumps

and other obstructions that could hinder water flow.

**Pays for itself quickly.** Because you spend less to install it, and practically nothing to maintain it. And you save because one man can easily handle a PVC system.

**Get it all from your Certain-teeed distributor.** Including PVC fittings and all the expert supervision you need. If keeping the turf watered and green is your responsibility, specify Certain-teeed PVC. You'll never have a big tournament called for lack of rain. For complete information, write: Certain-teeed Pipe & Plastics Group, Valley Forge, Pa. 19481.
