Agr. Chemical Association Sells Education Kit

The National Agricultural Chemical Association (NACA) believes that pesticide safety starts at home.

The NACA has introduced a series of 25 color slides and a prerecorded tape cassette home pesticide safety program.

Green Industry firms can use this kit to help community groups, youth organizations and individuals in local safety programs to develop awareness of individuals' responsibility in home pesticide safety. The price of the kit is \$11.95.

For more information contact: Safety Division, National Agricultural Chemical Association, 1155 15th St., N.W., Washington, D.C. 20005.

Safety And Health Changes Proposed By OSHA

OSHA has proposed new rules that would set procedures for the submission and consideration of certain required changes in state job safety and health programs.

Under the Occupational Safety and Health Act of 1970 and OSHA rules, state plans must contain assurances that as changes are made in Federal standards or enforcement procedures, corresponding changes will be made in the state programs so they will continue to meet the test of being "at least as effective as" OSHA's program.

Under the proposed rules, states would submit change supplements to OSHA Assistant Regional Directors for review and approval:

— generally within 30 days, when OSHA has issued or modified a job safety or health standard covering an issue in the state's program;

— when enforcement policies or procedures are revised or when legislative or regulatory changes have been made in the OSHA program, including recordkeeping and reporting requirements.

The rules also would require states to adopt emergency temporary standards within 30 days of OSHA issuance unless the state program does not cover that issue or unless the state shows there is no occupational exposure to the hazard within the state warranting an emergency standard.

Since state programs may include standards covering hazards for which there are no comparable Federal standards, revocation of an OSHA standard would not require revocation of a comparable state standard unless the state chose to do so.

1973 F.A.N.N.I.E. Award Presented To Bryson James

The 1973 F.A.N.N.I.E. "Man of the Year" Award for dedicated service to the nursery industry was presented by the Florida Associated Nurserymen to Dr. Bryson L. James.

James has served the nursery industry for many years and presently is professor and director of the University of Florida Agricultural Research Center in Ft. Lauderdale. He is leaving this position, however, in April to establish a private consulting service for nurserymen and plans to relocate in McMinnville, Tennessee.

1973 F.A.N.N.I.E. "Man of the Year", Bryson James, with award.
