

WEEDS TREES & TURF®

January 1976, Vol. 15, No. 1

16 TURF PEST CONTROL — EPA has created some rules and regulations concerning the use of specific chemicals that are being questioned by many Green Industry experts. Clemson University entomologist D. K. Pollet reviews the effects of EPA action on the turfgrass manager and his use of pest controlling chemicals.

22 Big Business in Ohio — Here's a report on December's Ohio Turfgrass Conference and Show. It was the largest and possibly the best showing ever for the Ohio Turfgrass Foundation as some 1,170 persons registered for the event.

26 Future Superintendent — The modern turfgrass manager faces a technical revolution. Turfgrass culture is becoming less of an art and more of a science as equipment becomes more sophisticated and chemicals more specific. J. D. Butler, associate professor, Colorado State University, takes a philosophical approach to the future and makes some interesting predictions.

36 Industry News — Stately Elm Returns. . . . Suggested Buying and Selling Standards for Nurseries. . . . "Bad Green Syndrome". . . . GCSAA Preview. . . . Pine Needle Scale Control. . . . Japanese Beetle Parasite Discovered in Northeast.
