LEARN PROFESSIONAL LANDSCAPING

We prepare you to cash in on countless money-making opportunities in modern landscaping and show you how, by easy steps, to start your own business part or full time. You will learn latest developments in Modern Landscaping, including creative design—plant propagation—revolutionary new methods of growing in manufactured soils—practical soil testing—growth regulators—the low

down on fertilizers—easy ways of plant identification—estimating and contracting. My unique home study course features easy to understand assignments with careful detailed illustrations. Certificate Awarded. May I send FREE, and without obligation, my informative BOOKLET?

NEW! AQUAPROBE

Sub-Soil Moisture Tester

AQUAPROBE takes the guesswork out of soil moisture testing. Scientifically measures moisture at depths from 2 to 26 inches. No digging; no fixed point of measurement. Amazingly light-weight, portable and easy to use. Aquaprobe is low in cost, too. Write:

DIRECTORY APPENDIX

The following equipment listing was inadvertently omitted from our 1977 Managers Guide to Equipment and Supplies:

Dedoes Industries, Inc. 1060 W. Maple Rd.,
Walled Lake, Mich. 48088

- Aerators
- Rollers
- Spikers
- Slicers
- Poa-annua Stripper

Fusarium wilt hits Texas shade trees

Two Texas shade trees, the mimosa and the mulberry, are suffering from fungus diseases.

Dr. Wendell Horne, a plant pathologist for the Texas Agricultural Extension Service, says the mimosa tree is being removed from the Texas landscape by Fusarium wilt. The fungal organism that causes the disease had its origin on the eastern seaboard and has spread westward in recent years.

The wilt, which also occurs in cotton, peas and watermelons, results from spores that become airborne after lying dormant in the soil. It affects plant vitality and the leaves. The tree later shows symptoms of color loss and droopiness and cracks along the bark soon appear, emitting a foul smelling sap.

Two resistant varieties of mimosa trees, Charlotte and Tyrone, are currently being used but not to a great extent in Texas, notes Horne. Furthermore, chemical controls for the disease are not profitable at this time. About all homeowners can do is to give the trees good cultural care and to avoid mechanical injury.

The mulberry tree is afflicted with a fungal leafspot disease during the autumn months. This shade tree loses its leaves as a result of a windborne fungus that produces the disease, explains Horne.

Let's keep Scouting going stronger than ever.

Today, more than ever, isn't it great to know Scouting is still going strong? Still helping our kids grow up to become good Americans. To be prepared.

Yes, thanks to the United Way and people everywhere, Scouting is still teaching honesty, self-reliance, respect, All the ideals worth believing in. Ideals worth supporting.

Get behind Scouting. Become a Sustaining Member. Make a contribution to your local Scout Council.
