Over forty actual and unretouched full-color photographs in a new 16-page catalog illustrate Rain Jet's Group "C" line of patented "Custom Crafted" fountains. These new high efficiency fountains achieve breathtaking Water SculptureSM in an infinite array of motion, texture and color, and are designed for economical use of electric power.

This new Group "C" color catalog, accompanied by an 8-page specification brochure and a price list, is available free on request from Rain Jet Corporation, 301 South Flower Street, Burbank, California 91503.

Rain Jet "Custom Crafted" fountains operate on a new principle never before used in fountain design. Multichannel nozzles expand solid water streams into fountains of prismatic crystals many times larger than the original streams. Because of the light reflecting properties of these thousands of magnifying prismatic crystals, more brilliant illumination is produced with considerably less electrical energy.

Nursery Supplies Inc. recently introduced their new Poly-tainer Classic line of plant containers. Sculptured sides not only make the container attractive, but direct the roots in-

ward and down, resulting in healthy, well-nourished plants. Special drain hole configuration insures proper drainage.

To insure a tough container for shipping and handling, Nursery Supplies Inc. is manufacturing the Poly-tainer Classic line from higher molecular weight polyethylene than is used in comparable injection-molded nursery containers. This is the same durable material that is used on industrial containers.

Two models of rear mounted rotary mowers for cutting grass and light brush have been approved by the Simplicity Manufacturing Co. for application with its 19 1/2 hp 9000 Series garden tractor. The equipment comes in 48 in. and 60 in. widths. All are attached by Category O three-point hitches for quick hook-up.

High speed suction blades lift the grass and brush for clean cutting. Full swivel caster wheels follow ground contour for uniform trim and avoidance of scalping. Free swinging blades retract on striking hard objects, protecting the blades and the entire machine. Cutting heights are adjustable from 1 to 9 in.

Western Products has announced the addition of a new salt spreader to their line. The Super Spreader is a rear bumper mounted, hopper type unit designed for commercial and industrial ice melting. Spreading speed is variable, slow to fast, and is regulated by an in-cab rheostat. Salt is fanned to the side and rear of the vehicle from 5 ft. up to 50 ft.

Western's Super Spreader features an adjustable mounting height for on-the-job flexibility. A low height setting allows the salt to get directly under parked vehicles, while a high setting gives one-pass coverage with a maximum spread width.

Allegratti & Co. announces the powerful new Paramount "Rota-Shear." It features a permanent magnet motor that produces higher torque, uses less current and cuts at lower rpm's to minimize cord breakage and wear. A full 16-in. cutting circle provides rapid and efficient mowing, trimming and edging.

The handle is contoured for comfort and features an instant "on/off" trigger switch. A husky handle adjusts easily to provide each operator with custom fit comfort and positive two-hand control.

A new spreader in a 21-inch width, with a long-life epoxy finish and precision flow control, has been introduced by O. M. Scott & Sons.

The new model is wider than the previous one, allowing faster application of lawn fertilizers, control products and seed. The Scott's precision flow control and calibrated settings allow lawn care products to be distributed evenly and precisely.

The spreader is constructed of heavy-gauge metal, coated with a rust-resistant epoxy finish. Other features include bronze graphite bearings, a spring-loaded on/off control, and the ability to be recalibrated.

Melnor Industries announces the addition of brass jet nozzles on two of their oscillating lawn sprinklers. The nozzles have been added to insure even water distribution and controlled spray.

The models involved are Nos. 525, which waters up to 2,200 sq. ft. in one setting, and 610, which covers up to 2,500 sq. ft. in a setting.

Massey-Ferguson's new-from-the-grass up MF lawn tractor will ease yardwork and light farm chores. One of MF's family of five new lawn and garden tractors designed for performance and operator comfort, this 8-hp machine can be used with 36-in. side or rear side-charge rotary mowers.

A wide range of specialized lawn care and snow removal attachments makes it a versatile machine. Inline transmission has five forward speeds and one reverse, with a speed range from 1.7 to near 6 mph. A foot pedal controls six different mower cutting heights.

Your Business can be one too.

Red Cross needs individual volunteers, and donors of blood and money, by the millions.

But we need even more help. We need the solid support of American Business. And we never needed it more.

If your business is already helping, by organizing blood drives, and by supporting payroll deductions—either directly for the Red Cross, or through the local combined fund drive—the whole community owes you thanks. And we thank you, too.

Last year, with help from our friends, we offered major aid at over 30,000 disasters—from typhoons, to local (but just as devastating) house fires.

We were able to help the elderly with practical programs, we helped veterans by the hundreds of thousands, we taught people by the millions to swim or swim better. And that's just the tip of the iceberg.

Think of America without The American Red Cross.

And you'll know why we need your business as a Red Cross Volunteer. In your community. And all across America. Contact your local Red Cross Chapter to see how your company can become a volunteer.

**Red Cross.
The Good Neighbor.**
